

Al's Coloring Book

Your children will love to color with this coloring book. Choose from many colors and pictures. And when they're all done coloring, print it out and hang their picture up.

Boingo Electro

You control Boingo, a bouncy little, er, "fellow" with wild hair. Boingo can bonk a raindrop back toward the top of the screen by touching it when it is blue. Don't touch an orange raindrop or BZZZZT! The goal is to protect the power jewels from the raindrops while avoiding electrocution in the process.

Break the Wall

This is a math drill game. The object is to click on bricks that have matching values. This game can test addition, subtraction, multiplication, and division at different levels of difficulty. This is a timed drill program, with great graphics and sound effects. To run efficiently, this program must be copied to your Hard Drive.

Castledion

The program offers a fun mystery game of search through the castle, with side tours that are educational. In the music room, children can learn how to score music and play it back. In the library, one book offers a spell matching game another book offers a "big letter, small letter" matching exercise. In the den you will find a typewriter which works just like a real one. To run efficiently, this program must be copied to your Hard Drive.

Catch a Letter

Children can practice upper case and lower case letters in this program. Letters fall from the top of the screen and you must press the same letter on the keyboard. To run efficiently, this program must be copied to your Hard Drive.
