

offeeBreak

This is a simple application that is designed to force you to take periodic breaks, so that you can reduce your chances of getting a Repetitive Stress Injury. You may set an amount of "work time", during which Coffee Break sits in the background with a timer displayed, and an amount of "break time" during which you are forced to take a break from the computer. To run efficiently, this program must be copied to your Hard Drive.

ialog View

Dialog View is a control panel that allows you to change the appearance of directory dialogs (Open and Save dialogs). You can control what kind of icons are used, increase the height and width of the file list, and set the font for the file list. To run efficiently, this program must be copied to your Hard Drive.

omeInventory

Home Inventory is a log to keep an inventory of all your personal belongings. There are nine categories to keep you organized. To run efficiently, this program must be copied to your Hard Drive.

ineticon

Kineticon is a system extension which replaces normal, static icons on your Macintosh's desktop and in its windows with chosen animated icons. Kineticon is fully configurable, allowing you to choose which icons should animate simply by enabling them within the built-in editor. To run efficiently, this program must be copied to your Hard Drive.

y Book of Books

My Book of Books is a log book for readers. Here you can keep track of information about every book you read, your comments on the book, your personal rating of the book and more. To run efficiently, this program must be copied to your Hard Drive.
