

## ars Rising

As the story begins, Martian secessionists have destroyed your people's occupied forces, and your spies have reported that this rebel faction is gearing up to launch an all-out attack. That simply won't do, you say, as you make your way to the experimental Vac-Fighter. Armed with a Wave Motion Gun and a bottom-mounted, explosive payload delivery system, it's up to you to liberate the stranded Martian colonists. Battle secessionist minions on land and in the air, reclaim 28 critical areas, and recapture the Red Planet. Your friends on Mars are counting on you. Don't let them down. This program is to be used with Power PC computers only. To run efficiently, this program must be copied to your Hard Drive.

## PC Gallery

This game is a new version of the classic shooting gallery game. Your enemy is the teddy bear. Cute. Cuddly. Deadly. When he shows up in the game screen, move the cursor crosshairs and mow him down before he has a chance to open fire on you. Oh, and whatever you do, make sure your aim is true, because the last enemy on each level can end your game with one shot, no matter how many lives you have left. This program is to be used with Power PC computers only. To run efficiently, this program must be copied to your Hard Drive.

## uper Othello

Super Othello is an implementation of the classic board game Othello, which is also known as Reversi. You play either red or green on an 8x8 grid, and the object of the game is to gain as many of your opponent's pieces before the game ends. Super Othello also allows you to watch a tutorial explaining the rules for flipping.
