# What is Vocabulary Wizard and what can it do?

## **Vocabulary Wizard is a vocabulary learning tool for Windows, Windows 95 and Windows NT.**

Vocabulary Wizard gives you an *efficient, fast and easy* way to study words. It was made for you and your friends or your students or your children who prepare for English vocabulary-related examinations such as the SAT, GRE, ACT, TOEFL, and so on.

**Vocabulary Wizard has a built-in dictionary of over 6,000 carefully chosen words that appear frequently on standardized tests.** Moreover, you are not limited to these 6,000 words; you can edit the dictionary and even add your own words to it. The data for each word in the dictionary consists of the following 9 components: (*word*), (*pronunciation*), (*part*), (*origin*), (*meaning*), (*2nd meaning*), (*example*), (*2nd example*), and (*reference*). In the near future, Vocabulary Wizard will provide you with various methods of creating your own dictionary. So you can make your own wordlists and share them with others.

**Each word in the Vocabulary Wizard's dictionary has its own specific attributes: *Study index*, *Check mark*, and *Master mark*.** The Study index of a word indicates how many times you have correctly answered test questions of that word. At the beginning of a test, all the Study indices of the words are 0. As your study progresses, the Study index of a word may be changed as a result of your answer. It can have one of the numbers between -3 to +3 as its value. For example, if your answer is correct once, the corresponding Study index will be +1. If wrong, it will be -1. If you are correct twice, it will be +2. If wrong three times, it will be -3 and so on. But the way to update it is not always proportional to the count number of the correct answers because Vocabulary Wizard also considers the frequency of the correct answers during the Study index update. Anyway, if all the Study indices reach +3, you may think that your study of the words is successful and perfect. A *Check mark* of a word can be given or removed by a user. If you meet an unfamiliar word or a word needs to be reviewed more, you can add a Check mark to it for later use. By doing this, you can collect the words with Check marks only and study them intensively. You can even save them into a special wordlist and print it on paper. A *Master mark* of a word is the opposite of a Check mark. If you already know a word very well, you can give a Master mark to the word. After that, it will be considered as a trivial word that you don't have to study any more. Vocabulary Wizard usually ignores the words with Master marks while creating test questions. Of course, you can remove the Master mark at any time. In order to achieve a faster enhancement of your vocabulary ability, you should concentrate on the words whose Study indices are below 0 (i.e. -1, -2, -3.) and which have Check marks.

## **Vocabulary Wizard supports up to 3 users.**

For each user, there are two user-specific files: \*.usr and \*.smk. A \*.usr file has the information about a user's name, font settings, and other option settings. A \*.smk file holds the study record of a user. Vocabulary Wizard saves and retrieves all the user information. You don't have to worry about any loss of information. When Vocabulary Wizard has been installed on a hard disk, three individuals can enjoy their own studies at the same time. You can edit your information and reset your study records at any time. The only thing you have to do is to select your username as a current user in the User menu.

## **Vocabulary Wizard offers three screens: the *Desk*, *Study*, and *Test* screens.**

In the bookstand of the *Desk* screen, you can pick wordbooks or wordlists you wish to learn and then put them on the desk. This is the first step for preparing your study. After setting up the desk, you can go to the Study screen or the Test screen.

In the *Study* screen, Vocabulary Wizard presents you with a flashcard slide-show of words. It gives you a variety of options to customize your study. You can adjust the display frequency. You can make some components visible or invisible on the screen. You can even extract only the words with a specific Study index or a Check mark from the desk and list them by the specified order. As mentioned above, you can save and print wordlists easily. You can insert the saved wordlist as a new wordlist into the bookstand. You can directly put it on the desk even without creating a new wordlist.

In the *Test* screen, Vocabulary Wizard generates various test questions from the wordbooks on the desk. In the test option dialog box, you can choose a test style and the attributes (a Study index, a Check mark,

and a Master mark) of the words in the test. There are three test styles: Test1 (word-to-meaning multiple choice), Test2 (meaning-to-word multiple choice), and Test3 (spelling exercise). You can make Vocabulary Wizard offer questions only for the words whose Study indices are below 0. You can refer to the dictionary at any time for your further study. You can even print a series of questions and corresponding answers into plain text files.

**Sounds complicated?** Don't worry. Vocabulary Wizard is also easy to use. You can quickly learn how to navigate from screen to screen, and Vocabulary Wizard offers a variety of keyboard and mouse shortcuts and a nice toolbar. If you get into trouble or can't figure out how to do something, just look at these Help topics, or send an email to [ddam@nownuri.net](mailto:ddam@nownuri.net). Vocabulary Wizard is quite the thing! Once you've studied with it for a while, you'll see how much it can help you prepare for exams.

## Desk & Bookstand

In the desk screen, Vocabulary Wizard lets you prepare your vocabulary study. You can also manipulate data related to the bookstand and the dictionary.

### Basic Procedure:

- Select a wordbook or a wordlist that you wish to study in the bookstand. The bookstand is featured as a tree structure. Double-click a wordbook if you want to unfold or fold it.
- Click > button. The selected wordbook or wordlist will be loaded on the desk. In case of a wordlist, you can also put it on the desk with double-clicking it. In order to unload a wordbook (or a wordlist) from the desk, select it and click < button. You can load as many wordbooks (wordlists) as you like at the same time.
- LCD panel shows you the attribute statistics of the wordbooks (wordlists) on the desk. Those numbers indicate how many words with a certain Study index (or with a Check mark or with a Master mark) there are on the desk. (no double-counting of a same word)
- Now, are you ready? Go to the Study screen or the Test screen!

### See also:

[Loading a wordlist file on the Desk](#)  
[Inserting a wordbook \(or a wordlist\)](#)  
[Filling a wordlist](#)  
[Importing a pronunciation data](#)

## Loading a wordlist file on the Desk

You can load up to 3 wordlist files directly onto the Desk at the same time.

Before loading the wordlist files (\*.wlf), they should be created and be prepared in the Study screen.

- 1 Click **WLF>** button on the Desk screen.
- 2 Choose one of the wordlist files in the file dialog box, and click **OK**.
- 3 Then the file is loaded on the Desk.
- 4 You can create new wordlists of the Bookstand from wordlist files. Refer to See also topics.

### See also:

[Inserting a wordbook \(or a wordlist\)](#)

[Filling a wordlist](#)

[Saving a wordlist](#)

## Inserting a workbook (or a wordlist)

You can insert a new workbook or a new wordlist to the bookstand.

- 1 Select an existing wordlist or workbook in the bookstand. Then you can insert a new workbook or a new wordlist to the next of the selected one.
- 2 On the **Data** menu, click **Insert Wordlist**.
- 3 In the **Insert Wordlist** dialog box, type the title, select the type, select the depth, and then click **OK**.
- 4 If you insert a wordlist, the **Fill Wordlist** dialog box will be display automatically.

### See also:

[Filling a wordlist](#)

[Inserting a word to the wordlist](#)

## Filling a wordlist

You can fill an existing wordlist (that is probably empty or is to be updated) with new word entries.

- 1 Select an existing wordlist (not a workbook) in the bookstand.
- 2 On the **Data** menu, click **Fill Wordlist**.
- 3 In the **Fill Wordlist** dialog box, select the fill options that you want, and then click **Fill**.
- 4 In the **Open Wordlist Source File** dialog box, select the wordlist source file (\*.wlf, or \*.vtx) that has the word entries with which you want to fill the wordlist, and then click **OK**.
- 5 You can repeat 3,4 as many as you want. The total count number of the words that the wordlist has will be displayed on the dialog box.
- 6 After filling it, click **Save**, and then click **Close**.

**See also:**

[Inserting a workbook \(or a wordlist\)](#)

[Inserting a word to the wordlist](#)

## Importing a pronunciation data

You can import additional voice pronunciation data into the Dictionary. Prosigner will provide you the data files (\*.pdf) through its home page ([www.prosigner.com](http://www.prosigner.com)). Finally all the pronunciations of the words in the dictionary will be served as CD-ROM media. At that time, this feature will be obsolete or rarely used.

- 1 On the **Data** menu, click **Import Pronunciations**.
- 2 Select the pronunciation data file (\*.pdf).
- 3 Then Vocabulary Wizard maps the voice data into the words in the dictionary automatically for you.

# Study

In the study screen, Vocabulary Wizard presents you a flashcard slide-show of words that come from the wordlists on the desk or the recently used wordlist. You can specify the attributes of the words that can be shown in the screen. You can set slide-show parameters (e.g. frequency, delayed meaning display, visible components of words) as you like. After setting the options, you can play the slide-show automatically or manually. You can even print the wordlist on a paper. Vocabulary Wizard gives you comfortable functionality to review words and check your knowledge of them as fast as possible.

## Basic Procedure:

- In the **Study Options** dialog box:
  - Select a wordlist source and the attributes of the words to be shown.
  - Select a method by which the words are sorted.
  - Set the other options.
  - Click OK button.
  - Based on the above selections, Vocabulary Wizard creates a temporary wordlist for a slide-show.
  - The first word of the wordlist will be displayed on the screen.
- Click > button or press the **RIGHT** arrow key to see the next word.
- Click < button or press the **LEFT** arrow key to see the previous word.
- You can specify visible components of a word through the toggle buttons at the bottom of the screen.
- You can adjust the frequency of a slide-show on the fly.
- If you find unfamiliar words, add a Check mark by clicking **Check mark** on the toolbar or pushing **GRAY +** key on the numeric keypad.
- If you wish to remove a word from the current wordlist, push **GRAY -** key on the numeric keypad. This action is different from adding a Master mark.
- By clicking **Auto**, Vocabulary Wizard play the slide-show automatically. To stop it, click **Stop**.

## Items (Numbers and Buttons) at the bottom of the screen:

### Number (left)

[<]

[>]

Indicates the total count number of the words in the current wordlist

Goes to the previous word

Goes to the next word (step)

### [Auto/Stop]

### Number (middle)

Plays/Stops the slide-show

Indicates the interval period between a word and a word in 0.1 second unit (you can adjust this number by clicking the up/down arrow buttons next to it.)

### [d] button

### Number (right)

Delays displaying word meanings, examples, and references

Indicates the duration period between showing a word spelling and showing rest components (you can adjust this number by clicking the up/down arrow buttons)

next to it.)

|             |   |
|-------------|---|
| <b>[p]</b>  | Makes (pronunciation) visible             |
| <b>[o]</b>  | Makes (origin) visible                    |
| <b>[m1]</b> | Makes (meaning) visible                   |
| <b>[m2]</b> | Makes (2nd meaning) visible               |
| <b>[e1]</b> | Makes (example) visible                   |
| <b>[e2]</b> | Makes (2nd example) visible               |
| <b>[r]</b>  | Makes (reference) visible                 |
| <b>[bc]</b> | Change the background color of the screen |

#### **Keyboard and Mouse:**

|                      |   |
|----------------------|---|
| <b>GRAY +</b>        | Toggles Check mark                        |
| <b>GRAY -</b>        | Removes a word from a slide-show wordlist |
| <b>Ctrl+I</b>        | Toggles Check mark                        |
| <b>Ctrl+M</b>        | Adds Master mark                          |
| <b>F7</b>            | Displays the Study Options dialog box     |
| <b>LEFT</b>          | Goes to previous word                     |
| <b>RIGHT</b>         | Goes to next word                         |
| <b>DOWN</b>          | Goes to next word (step)                  |
| <b>ENTER</b>         | Goes to next word (step)                  |
| <b>SPACE</b>         | Goes to next word (step)                  |
| <b>F10</b>           | Sounds voice pronunciation                |
| <b>RIGHT (MOUSE)</b> | Goes to next word (step)                  |

#### **See also:**

[Printing a wordlist on paper](#)

[Inserting a word to a wordlist](#)

## Printing a wordlist on paper

You can print the current wordlist of the Study Screen on paper.

- 1 Click **Print Wordlist** on the **Study** menu, or click **Print** on the toolbar.
- 2 Select the printing items, the number of columns, fonts size, margins, and header.
- 3 To select the output printer or set paper size, click **Printer Setup** on the **User** menu.
- 4 To preview, click **Preview**. To print, click **Print**.

**See also:**

[Printing questions to a text file](#)

## Saving a wordlist

You can save the current wordlist of the Study screen at any time.

- 1 Click **Save Wordlist** on the **Study** menu, or click **Save** on the toolbar.
- 2 In the dialog box appeared, select the options that you want, and then click **Save**.
- 3 Type the name of the wordlist file and click **OK**.
- 4 What can you do with this saved wordlist file? Please, refer to See also topics.

### See also:

[Filling a wordlist](#)

[Inserting a word to a wordlist](#)

## Inserting a word to a wordlist

You can insert a new word entry to the current wordlist of the Study screen.

- 1 In the Study screen, open the Dictionary with clicking **Dictionary** on the toolbar.
- 2 In the **Dictionary** dialog box, type or find the word that you are going to insert into the current wordlist.  
You can register a new word into the Dictionary if necessary.
- 3 Click \* (**asterisk**) button.
- 4 You can insert a new word before or after the current displayed word in the wordlist.
- 5 You can repeat 2,3,4 as many times as you want.
- 6 The inserted words are also written down onto VWIZTMP.VTX file automatically for later use. It will be helpful when you fill an empty wordlist in the Bookstand.

# Test

Vocabulary Wizard gives you various test questions. It automatically generates them on the basis of the Test Option settings. There are three types of the test questions. You can specify the attributes of the words that can be questioned. You can even print questions to a text file for a paper test. Through this session, you can exercise yourself for real tests.

## Basic Procedure:

- In the **Test Options** dialog box:
  - Select a type of questions and attributes of the question words.
  - Select a style of displaying meanings.
  - Set the other options.
  - Click **OK**.
  - The first question will be displayed on the screen.
- In **Test1**, you should guess a correct meaning of the given word.
- In **Test2**, you should guess a word of the given meaning.
- In **Test3**, you should enter a word of the given meaning.
- After a short guess, click a number button or press a numeric key or enter a word and press **ENTER**.
- To pass a test question without answering it, click **Q** or push **ENTER** key or press **RIGHT (MOUSE)** button.
- Then Vocabulary Wizard shows the result of your answer. If you are correct, it gives you **O** sign. If wrong, you are given **X** sign.
- To get more information about words, just click the corresponding number buttons. Then the dictionary will pop up with proper information.
- Of course, the result is to be reflected on the Study index of the word.
- Youd better not hesitate to assign a Check mark or a Master mark whenever you think it is needed.

## Keyboard and Mouse:

|                      |                                      |
|----------------------|--------------------------------------|
| <b>GRAY +</b>        | Toggles Check mark                   |
| <b>GRAY -</b>        | Toggles Master mark                  |
| <b>Ctrl+I</b>        | Toggles Check mark                   |
| <b>Ctrl+M</b>        | Toggles Master mark                  |
| <b>F8</b>            | Displays the Test Options dialog box |
| <b>F10</b>           | Sounds voice pronunciation           |
| <b>ENTER</b>         | Goes to next question                |
| <b>RIGHT (MOUSE)</b> | Goes to next question                |

## See also:

[Printing questions to a text file](#)

## Printing questions to a text file

You can print questions and answers to a text file. The extension of the file is TST which means Test. If you create a TST file, a corresponding ANS text file will be automatically created which includes the correct answers of the questions.

- 1 On the **Test** menu, click **Print Questions to a Text File** or click **Print** on the toolbar.
- 2 In the file dialog box, type the filename of the text file, and then click **OK**.
- 3 In the **Test File Save** dialog box, add question items by clicking **Add**.
- 4 When you see **Test Options** dialog box, select the options, type the number of questions, and then click **OK**.
- 5 You can repeat 3,4 as many times as you want.
- 6 To remove a existing question item, select it in the list box, and click **Delete**.
- 7 After adding question items, click **Save**, and then click **Close**.

## Test:

Printing questions to a text file

# Changing user information

Vocabulary Wizard supports up to 3 users. Each user has his or her own study records, name, and option settings in the corresponding \*.usr and \*.smk file. You can find the current users name on the applications title bar. If you are using Vocabulary Wizard with other users, youd better check if the current user stands for you or not before your study.

## Changing the current user:

On the **User** menu, click the users name that stands for you.

The your study records generally mean Study indices, Check marks, and Master marks of the words that you have studied. You can change your name, reset the Study indices to 0, remove Check marks, and remove Master marks. You can even limit the changes to the words on the desk not the whole words in the dictionary.

## Initializing your name and records:

- 1 On the **User** menu, click **User Properties**.
- 2 To change your name, type a new name in the dialog box.
- 3 To change your study records, select the options that you want and click **Change**.
- 4 You can repeat 3 if necessary.
- 5 After changing them, click **OK**.

# Fonts Setup

You can all the fonts of the characters that are displayed on the screen.

- 1 On the **User** menu, click **Fonts**.
- 2 Select the display item in the list box and then click **Change**.
- 3 Select a font from the **Font** dialog box.
- 4 You can repeat 2,3 as you want.
- 5 To reset all the settings with the default values, click **Reset**.

# Using the Dictionary

You can refer to Vocabulary Wizards Dictionary at any time. This dictionary plays an important role as a database internally and it gives you quick references for unfamiliar words. You can add new words or additional information into it. You can edit the existing data.

## Components of a word:

|                 |  |
|-----------------|--|
| (Word)          | spelling of the word   |
| (Pronunciation) | phonetic symbols   |
| (Part)          | part of speech   |
| (Origin)        | information of its origin  |
| (Meaning)       | 1st meaning (mainly in English)                                      |
| (2nd Meaning)   | extra meaning or translation of its 1st meaning in foreign languages |
| (Example)       | 1st example (mainly in English)                                      |
| (2nd Example)   | extra example or translation of its 1st example in foreign languages |
| (Reference)     | synonyms [+], antonyms [-]   |

## How to open:

- 1 Click **Dictionary** on the **View** menu or on the toolbar.
- 2 In the Study screen, it pops up with the current word initially.
- 3 In the Test screen, it pops up with the answer word. If you want to know details among the words of the multiple choices, click the number buttons, then it shows you the corresponding words.
- 4 If you check or uncheck **Max**, the size of the Dictionary will become normal or large.

## Finding a word:

- 1 Type the word you want to refer and press **ENTER** or click **Find**.
- 2 If the word already exists in the Dictionary, it will be shown to you. Otherwise, the similar words will be listed on the list box. You can click a word item in the list box to see details.
- 3 If the word has its voice pronunciation data, the Dictionary sounds it at the same time. You can hear it again with clicking **Voice**.

## Adding a word:

- 1 Type the word you want to add and click **New**.
- 2 Fill in the data form appropriately as much as you can. See [Components of a word](#). You should check at least one part of speech in the **Part** group box.
- 3 To type phonetic symbols of the word, refer to [Keyboard mappings](#).
- 4 After filling, click **Save** and then click **Close**.

## Editing an existing word:

- 1 Type the word or find the word whose data you want to edit.
- 2 Click **Edit**.
- 3 Update the existing data or add some contents.
- 4 After editing, click **Save** and then click **Close**.

### Arranging whole data:

- 1 To arrange the index file of the Dictionary, click **Arrange**.
- 2 You can even remove redundancies in the data file. But this process will be very lengthy.
- 3 Youd better arrange the Dictionary once a month.

### Keyboard mappings for phonetic symbols:

|          |                     |
|----------|---------------------|
| symbol ▶ | θðʃʒɛŋhprɑæʌɔɜːəʔ˘  |
| key ▶    | [ ]S3ENHPRA@^OJ:U'` |

- 1 In the above figure, the first row indicates the phonetic symbols and the second row indicates the corresponding keys.
- 2 You can input the first accent(') and the second accent(`) of the word. The second accent(`) should be located before a vowel while the first accent(') should be located after a vowel.
- 3 After typing and saving, Vocabulary Wizard converts the accent symbols into the proper formation.

# Vocabulary Wizard Registration Information

You can pre-order Vocabulary Wizard by email or at Prosigner's home page. Within 2 business days of receiving your order, Prosigner will email a regular registration form and detail information. If you have any questions about ordering, please do not hesitate to email Prosigner at [ddam@nownuri.net](mailto:ddam@nownuri.net). When another registration method is prepared, it will be noticed in Prosigner's home page.

## With a Registered Copy:

- 1 There is no limit on the number of the words that can be loaded on the Desk at a time. In a demo version, it is limited to only 7 words.
- 2 You can even get the upgrade discount continually from us.

**Registration Fee (Price):**     **US\$ 28.00**     (for personal license)

(see [License and Copyright](#) for multiple licenses)

## Registration Procedure:

- 1 First! Email us your pre-order that includes your e-mail address, residence, country and opinion about Vocabulary Wizard, or visit our home page, fill in the pre-order form, and then submit it.
- 2 After getting your pre-order, we'll email you a regular registration form and detail information.
- 3 You can pay with one of the possible ways: a personal check or money order or cashier's check or with an international money order drawn in US dollars.
- 4 As soon as receiving your payment, we'll send you a registered copy via e-mail file attachment.

## Prosigner:

E-mail: [ddam@nownuri.net](mailto:ddam@nownuri.net)

Home page: <http://www.prosigner.com>

## Other programs from Prosigner

You can find information on Prosigner's other products at <http://www.prosigner.com>. You can also download the latest versions of our shareware products from there:

### Memory Wizard:

- Memory Wizard is a small-sized Windows95/NT(32Bit) application truly helps you memorize whatever you have to learn by heart.
- MemWiz pops up periodically with user-prepared questions and answers on your monitor.
- For anyone who works on a PC every day.
- For anyone who has a lot of things to memorize steadily.
- Especially for students and those preparing themselves for examinations!
- You don't have to worry about when and how to brush up on your knowledge and wisdom.
- MemWiz will take care of your review practice automatically for you.
- Enjoy the user-friendly interface of Memory Wizard!

### L/C Wizard (Listening Comprehension):

- 
- LCWiz is a Windows95/NT(32Bit) application that develops your listening skills in foreign languages!
- LCWiz records human voice or music from your audio tapes and compact disks into digitally remastered files, and provides you with a convenient means to transcribe audio recordings into text.
- For anyone who has to learn how to listen to and how to speak foreign languages efficiently and comfortably. Especially for students & teachers of foreign languages.
- You won't have to wrestle with your cassette player any more.
- From now on, you won't need pencils & notebooks to transcribe your recordings.

# License and Copyright

Vocabulary Wizard was created by Prosigner.

## Software License

Please read the following lines carefully before using this software. If you disagree with any of the following, you are not allowed to use this program. You MUST then delete it immediately.

Vocabulary Wizard may be freely distributed subject to the conditions below, but please consider registering if you decide to use this program after evaluating the unregistered shareware version. Vocabulary Wizard may NOT be distributed in any retail package (Shareware collection or otherwise) without written consent of Prosigner. If Vocabulary Wizard is included in any non-retail CD-ROMs or other packages, please let us know so that we can keep track of the distribution. If you would like to include Vocabulary Wizard in a retail package, please contact us for more information. The registered copy granting the full use of all the functions in Vocabulary Wizard may only be used on a single machine at any given time. By receiving a registered copy from us, you are agreeing to this license. A registered copy can only be given out by Prosigner, or an agent acting on behalf of Prosigner officially authorized by Prosigner.

## Registered version (personal license)

The registered version may be installed on as many computers as desired, as long as it is ONLY running on one at any one time (i.e. one installation at home and one at the office used by the same person). The usage by multiple people at the same time (on multiple computers) requires additional licenses.

## Multiple licenses (additional licenses)

Multiple licenses allow an institution, company or school to install the program on multiple computers or on a server. It must be guaranteed that the program does not run on more machines at the same time than there are licenses purchased. Additional licenses cost US\$ 15.00 for the 2nd to 10th license, etc. For larger amounts than 50 please contact Prosigner. Each additional license also allows a single user to use the program at home.

## Warranty Disclaimer:

Prosigner makes no warranty of any kind, expressed or implied, including any warranties of fitness for a particular purpose. In no event will the company be liable for any incidental or consequential damages arising from the use of, or inability to use, this program.
