

What Smart Kids Know about the Environment

The environment is important to all life forms on Earth including plants, animals, and humans. Smart Kids need to do their best to care for it. Properly caring for the environment starts with an appreciation and understanding for what affects the environment, and developing environmentally friendly habits. Smart Kids don't throw anything away that will damage the air, land or water. They also know how to reduce waste by re-using and recycling everything they can. Help your children to be Smart Kids and do their part to help save the environment.
