

## **Hansen Software's E-Mail Games, v3.1**

"Read Me"

### **Description**

Hansen Software introduces a new way to play games. Moves are transmitted between two players by the cutting and pasting of ordinary E-mail text to the Windows clipboard. Program includes three games: 3D Tic Tac Toe, Four in a Row ("Connect Four" (TM)), and Mid-Switch ("Othello" (TM)).

### **System Requirements**

*Software:* Windows 3.1 (or Windows '95, or OS/2 Warp W/ Windows, or other compatible operating system), "VBRUN300.DLL", and "Wing Dings" font. VBRUN300.DLL is commonly used by many shareware programs today, and is available from most all on-line services (and from the Hansen Software Web site). Wing Dings font comes standard with Windows 3.1 & '95.

*Hardware:* Any computer capable of running Windows 3.1, is suitable for this program.

### **Registration**

Prior to registration, the entire program is completely functional, except that player names may not be entered ("generic" names are used instead), and "About" is automatically displayed during startup. The registration fee is \$5.00 U.S. (registration form integral to program *must* be used). Outside North America, add \$1.50 for postage and handling.

### **Installation**

(For help with these steps, see your Windows and/or DOS manual)

- 1) Create a new directory (or folder).
- 2) Copy all of the files into the new directory. The files included are:  
**HSEMG31.EXE**  
**HSEMG31.HLP**  
**COMMDLG.DLL**  
**CMDIALOG.VBX**  
**THREED.VBX**  
**README.WRI**  
**VENDINFO.DIZ**  
**FILE\_ID.DIZ**
- 3) Run "HSEMG31.EXE" and/or add it as a new "program item".
