The game goes under if you run it on a standard amiga 1200. This simple dos script makes it possible for you to run UFO on your 2meg amiga 1200!

Just run the 'ufo_install' from shell or from its icon. It will then ask you for the path where you installed UFO, ie 'HD0:Games/UFO/'

DON'T BE SCARED AND BREAK THE SCRIPT! If you do, you'll never get UFO work on your amiga..

```
