 AmigaGuide/Path

  should search through when it attempts to open a database.

  For example:

    SetEnv AmigaGuide/Path "Workbench:Autodocs Workbench:Includes"

 AmigaGuide/Pens
  Gives you control over the colors that AmigaGuide® uses to
  render the text and link points with.

    SetEnv AmigaGuide/Pens <abcdefgh>

  where:

    a = Background pen
    b = Button text pen
    c = Button background pen

```
   d = Highlighted button text pen
   e = Highlighted button background pen
   f = Outline pen
   g = Highlight outline pen
   h = Text on background pen
```

 For example:

```
   SetEnv AmigaGuide/Pens 21213001
   SetEnv AmigaGuide/Text BOLD
```

 will give a very sharp look.

AmigaGuide/Text
 Enables you to determine what the link points look like.
