### 1.1 simple\_gui.guide

SIMPLE.GUI

To add new custom window to Real 3D:

1. Create a RPL GUI program and place it in the 'gui' directory.
2. Define new menu in the 'startup\menus.rpl' file. For example:

```
: myMenu  
  "gui/mytool.gui" LOAD  
;  
  
& myMenu "Examples/MyTool" ADDMENU
```

where 'gui/mytool.gui' is the name of your gui program.
