

## Delta Force

Patch

### COMPANY

[NovaLogic](#)

### SIZE

3.7 MB

### ADDED

7/3/99

This version enhances multiplayer capabilities of Delta Force. It now includes matchmaking via NovaWorld. To get the update, accept the automatic update or select the main menu option to get the latest version online.

Development update notes: The development update works with US versions of Delta Force only. DO NOT download and install if you are running a non-US version of the game as you will corrupt your game. The update is scheduled for universal implementation to all versions very soon. This is a development update that addresses NovaWorld gameplay issues and allows users to play on NovaWorld development servers. If you install this update from your existing US version, you will not likely have to install another update when transferred from the development servers to the new Delta Force servers.
