

ActiveX™ Animation Player

for Microsoft® PowerPoint® for Windows® 95

What

The ActiveX Animation Player for Microsoft PowerPoint for Windows 95 is the fastest and easiest way for users to publish and view PowerPoint animation and presentations in their Web pages. With this free Internet browser extension, users can take advantage of the enhanced animation, hyperlinks, special effects and built-in sound functionality in Microsoft PowerPoint 95 to build dynamic, animated Web pages that stand out from static HTML Web pages. The Animation Publisher allows users to compress animated PowerPoint presentations prior to posting, making downloading and viewing PowerPoint effects and presentations faster than ever.

How

With the ActiveX Animation Player, users will be able to do the following:

- **Publish animated and interactive Web pages using PowerPoint.** The Animation Publisher provides an easy way to create live, interactive animations for HTML pages that play seamlessly in today's standard web browser environments.
- **Quickly download and render PowerPoint graphic images:** With file compression .ppz, user will be able to save their PowerPoint files in a compressed state, decreasing download and rendering time.
- **Create Image Maps to link to other Web pages:** Users can create branches to other Web pages using the Interactive Settings tool when creating their files in PowerPoint 95.
- **Add Continuous Sound.** Users can link Real Audio files to play or narrate continuously throughout the PowerPoint presentation. Sound is streamed in, so download speed is fast.
 - **Render animation, sound and PowerPoint 95 multi-color fills and textures:** All the sounds, animation and fills used in the PowerPoint 95 presentation will be displayed and played when using the Animation Player.

Why

The Animation Publisher is an easy Internet publishing solution that levels the playing field for all Web page publishers. PowerPoint users can leverage their knowledge of PowerPoint to quickly and easily generate "live" Web pages including PowerPoint animation, sound and special effects. The Animation Player is ideal for corporate Intranet use; users can share and publish PowerPoint files for posting and sharing valuable business presentations or dynamic internal team training.

When

The ActiveX Animation Player and Publisher can be downloaded from the WWW at [HREF="http://www.microsoft.com/mspowerpoint/](http://www.microsoft.com/mspowerpoint/)
