Antivirus • Firewall • Antispam • Antispyware • Parental Control

All-inclusive protection against Internet threats

BitDefender Internet Security v10 provides all the security an Internet-connected household needs. Packed with the most powerful features, it provides comprehensive protection against viruses, spyware, spam, scams, phishing attempts, intruders and objectionable web content - keeping all your treasures safe.

Antivirus

Protects your computer against viruses and other malware.

- Filters all possible virus points of entry: shares, downloads, web traffic, Peer-2-Peer and IM applications, removable drives, etc.
- Blocks unknown viruses using advanced proactive detection techniques.
- Scans incoming and outgoing e-mail without any additional configuration.

Firewall

Keeps intruders away and controls the access of applications to the Internet.

- Filters all incoming and outgoing network connections.
- Renders decision making easier than ever due to predefined rule sets.
- The Stealth Mode hides your computer from malicious software and hackers while you are online.
- Automatically detects and protects your computer against port scans.

Antispam

Blocks unwanted e-mail and phishing attempts.

- Classifies e-mail as spam/legitimate based on user preferences.
- Seven types of filters further refine control over e-mail.
- Adaptive engines respond faster to new spamming techniques.
- Protects against scams aimed at accessing sensitive data.

Antispyware

Monitors and prevents potential spyware threats in real-time

- Monitors dozens of potential "hotspots" - places on your computer where spyware typically resides.
- Prevents sensitive information leaks via e-mail or web.
- The anti-dialer monitors the access of applications to your phone line.

Parental Control

Controls and limits access to web content and applications

- Blocks access to inappropriate web content and e-mail.
- Allows the use of predefined profiles based on user age.
- Allows or blocks web access during specified periods of time.
- Limits access to certain applications such as games and messaging software.

Services

Hassle-Free Hourly Updates

Your copy of BitDefender automatically updates itself once every hour over the Internet, directly or through a Proxy Server, making it truly an "install and forget" solution. Your product is able to repair itself, if necessary, by downloading the damaged or missing files from the BitDefender servers.

24/7 Support

Comprehensive protection meets comprehensive support! Qualified representatives provide BitDefender customers with free support online, via telephone or by e-mail. We've got you covered - all day, every day.

Technologies

IMPROVED Proactive Detection

B-HAVE (Behavioral Heuristic Analyzer in Virtual Environments) acts like a virtual "computer-inside-a-computer," running pieces of software in order to check for suspicious behavior. This BitDefender proprietary technology represents a new security layer that keeps your operating system safe from unknown viruses by detecting malicious bits of code before their signatures have even been released!

ENHANCED User Experience

BitDefender Internet Security v10 does its job while keeping system requirements at a minimum. Its state-of-the-art design allows for powerful defense against current Internet threats while being virtually burden-free on its users and host system.

Rescue CD

BitDefender Internet Security v10 is delivered on a bootable CD. You can use this CD to analyze/repair/disinfect a compromised system if you can't start it.

System Requirements:

Pentium II 350 MHz or higher processor
Minimum 128 MB of RAM Memory (256 MB recommended)
Minimum 60 MB available hard disk space

Operating Environment:

Windows 2000/XP IE 5.5 (+)
