

## Jaws PDF Creator™ Plugins MissingFontAbort

### ***Purpose***

The *MissingFontAbort* plugin will prevent a PDF file from being created if a font requested cannot be embedded.

### ***Compatibility***

The plugin is compatible with version 3.0 and later of Jaws PDF Creator.

### ***Installation***

Open the *Jaws PDF Creator* folder, and copy the file *MissingFontAbort.jcp* from the *plugins (inactive)* sub-folder into the *Default* sub-folder.

Jaws PDF Creator v3.0: This plugin requires the amended version of *prologue.ps* to be installed. If supplied as part of the package with the plugin it should be copied into the *Default* sub-folder in the *Jaws PDF Creator* folder, replacing the existing file by the same name.

DO NOT perform this step for Jaws PDF Creator version 3.1 or later.

Advanced users of Jaws PDF Creator version 3.0 who have amended the *prologue.ps* file should be sure to take a back up of their previous version and to merge their changes into the new file.

WINDOWS: If you didn't select your own specific location when installing Jaws PDF Creator, you'll find the *Jaws PDF Creator* folder inside *C:\Program Files\JawsSystems*.

MACINTOSH: If you didn't select your own specific location when installing Jaws PDF Creator, you'll find the *Jaws PDF Creator* folder in *Applications* on the computer's primary hard disk.

Version 1.0.2, 31 Mar, 2003
