Jaws PDF Creator™ Plugins SearchableWinNT

Purpose

Most of the time the PDF files made with Jaws PDF Creator will be fully searchable – that is, tools designed to find text in PDF files will work correctly with them, and text copied out of the PDF will look correct when pasted into another application.

Under some circumstances this may not happen, and this plugin is designed to address one such instance – the use of some TrueType fonts in Microsoft Windows™ NT.

Compatibility

The plugin is compatible with version 3.0 and later of Jaws PDF Creator.

Installation

Open the *Jaws PDF Creator* folder, and copy the file *SearchableWinNT.jcp* from the *plugins (inactive)* sub-folder into the *Default* sub-folder.

   Jaws PDF Creator v3.0: This plugin requires the amended version of *prologue.ps* to be installed. If supplied as part of the package with the plugin it should be copied into the *Default* sub-folder in the *Jaws PDF Creator* folder, replacing the existing file by the same name.

   DO NOT perform this step for Jaws PDF Creator version 3.1 or later.

   Advanced users of Jaws PDF Creator version 3.0 who have amended the *prologue.ps* file should be sure to take a back up of their previous version and to merge their changes into the new file.

   WINDOWS: If you didn't select your own specific location when installing Jaws PDF Creator, you'll find the *Jaws PDF Creator* folder inside *C:\Program Files\JawsSystems*.

   MACINTOSH: If you didn't select your own specific location when installing Jaws PDF Creator, you'll find the *Jaws PDF Creator* folder in *Applications* on the computer's primary hard disk.

Usage

Once installed the plugin will activate when required – no user intervention is required.

Version 1.0.2, 31 Mar, 2003.
