**Step 1**

Double click on the Secured eMail icon on your desktop. This will start up the installation process.

Step 2

Select the language for the software and the installation process.

Installer Language

Please select a language.

English

OK   Cancel

Step 3

Read the welcome page and press Next.

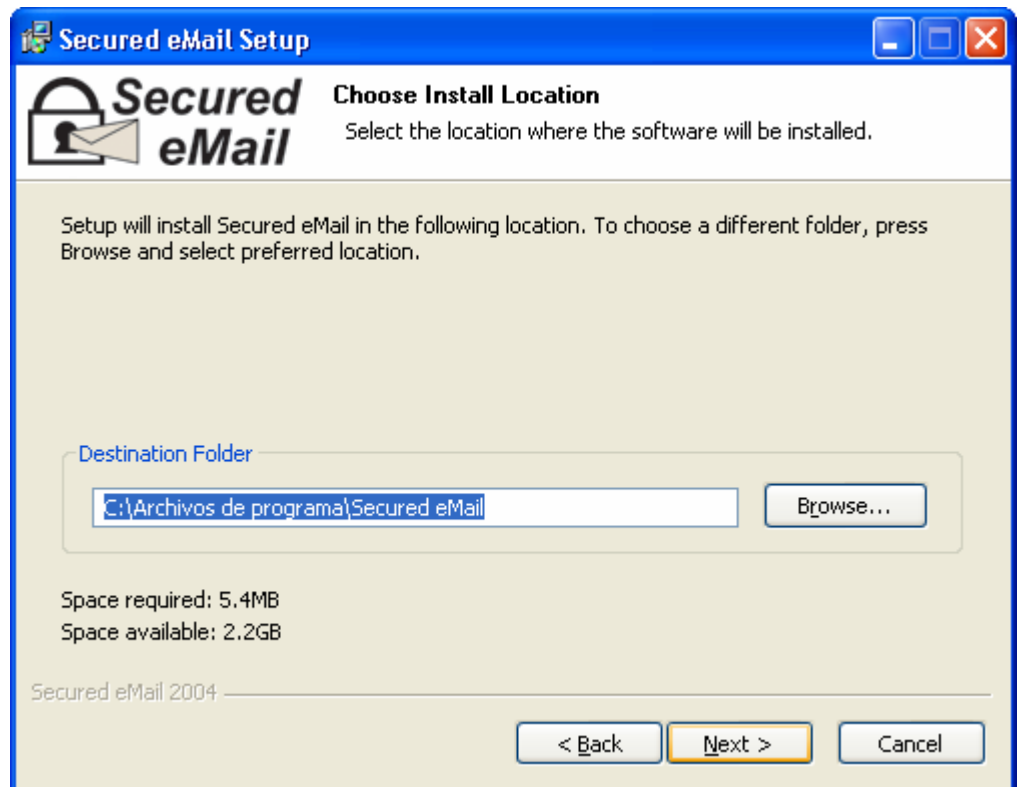

Step 4

Please read the License Agreement.

After reading the agreement, select "I accept" and press Next

Step 5

Please select a location to install the software

Step 6

Select whether you wish to install the software on all profiles or only your own.

Installing it for all profiles means that it will be activated for all users and they will not need to run the set-up themselves.
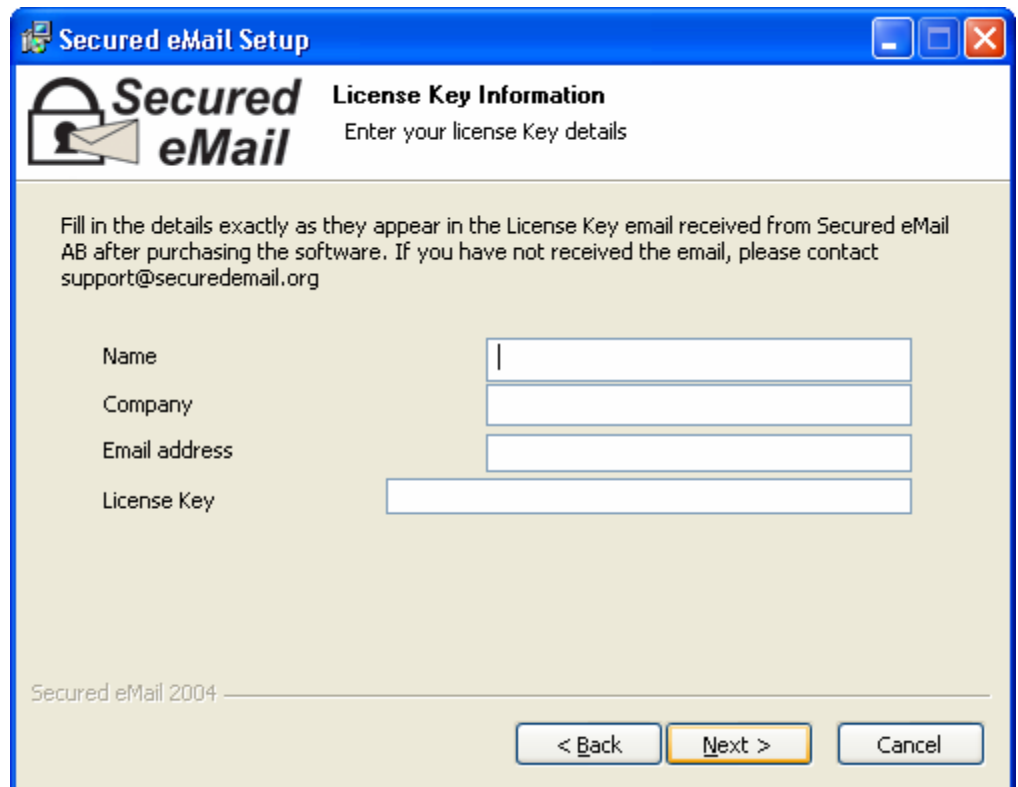

Step 7

Please fill in each field.

It is important that the details are entered exactly as they appear in the Secured eMail License Mail.
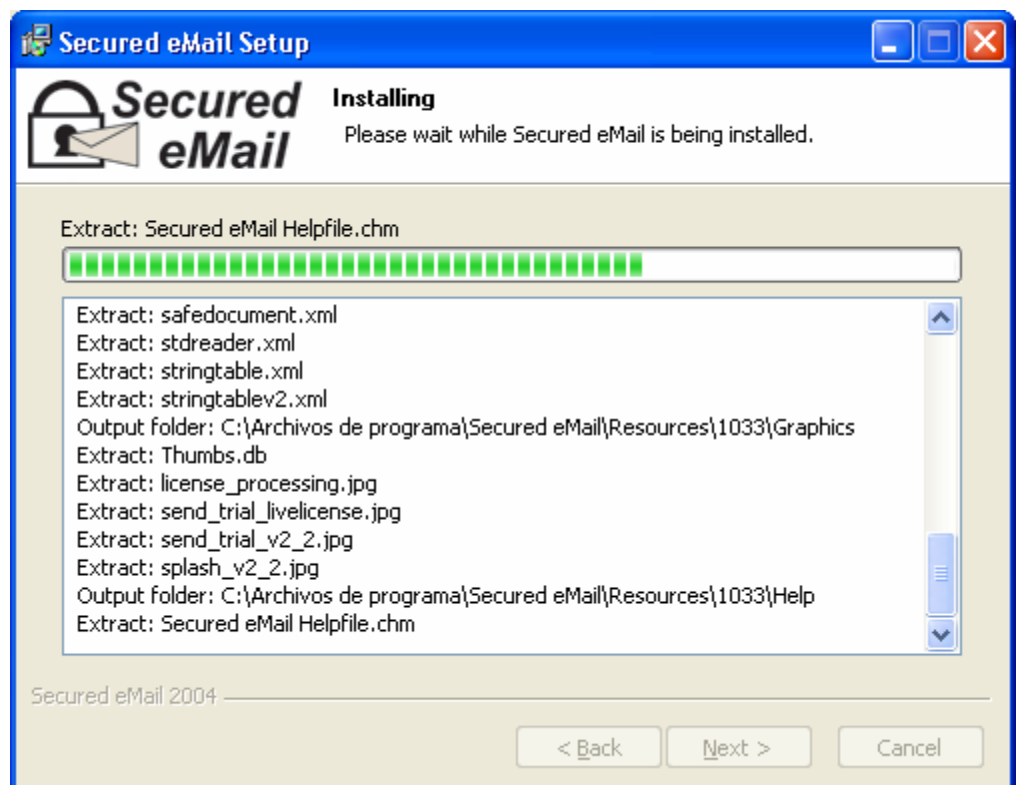

If entered incorrectly, the software will not recognise the user and will not function properly. You will only be able to read secured emails, and not send or write secured emails.

Secured eMail Setup

Secured eMail

License Key Information
Enter your license Key details

Fill in the details exactly as they appear in the License Key email received from Secured eMail AB after purchasing the software. If you have not received the email, please contact support@securedemail.org

Step 9

The installation process is complete. You are now ready to start using Secured eMail!

If the box is ticked, the Getting Started Center will be launched upon pressing Finish. The Getting Started Center is a quick guide to help you get started using Secured eMail.

The Getting Started Center

Tip:

A shortcut for the Getting Started Center will be placed on your desktop.
