SmartDraw Enterprise License Order Form   (For 10 or more seats)

With an enterprise seat license you simply count the number of different PC's that will use SmartDraw, then purchase a license for that many seats. You can install SmartDraw individually on each PC, or you can install it on a server and allow PC's to access it across a network. You don't need to buy a license for every PC attached to the network, just a number that actually use SmartDraw. SmartDraw keeps track of this for you. Visit the SmartDraw web site at http://www.smartdraw.com/enterprise/index.htm for more license information.

SmartDraw Concurrent License Order Form   (For 2 or more users)

Use this order form to purchase a SmartDraw Concurrent License.   Concurrent licenses are always installed on a server, and measures the number of network users running SmartDraw simultaneously. With a Concurrent License you can install SmartDraw on a network with any number of PC's. SmartDraw keeps track of the number of PC's actually using it at any one time and limits this to the number of users you actually licensed.   Visit the SmartDraw web site at http://www.smartdraw.com/enterprise/index.htm for more licensing information.

B: SmartDraw v6 multi-user/netwerk licenties

Het gebruik van SmartDraw via een netwerk vereist een multi-user licentie. Bij deze voordelige licenties hebt u de keuze uit twee typen: Workgroup Seat op basis van het aantal werkplekken waarop het programma gebruikt gaat worden (minimaal 10), en Workgroup Concurrent op basis van het maximale aantal gelijktijdige gebruikers (tenminste 2). Zie de engelse licentievoorwaarden elders voor uitgebreidere informatie. Bij iedere multi-user licentie is standaard één Media-set (CDROM) inbegrepen. Onderstaande prijzen zijn alle per PC resp. concurrent user, in EURO en **inclusief** 19% BTW.

B: SmartDraw v6 multi-user/network licenses

Using SmartDraw on a network requires a multi-user license. These economically priced licenses come in two flavors: Workgroup Seat Licenses (based on the number of computers on which SmartDraw will run, with a minimum of 10) and Workgroup Concurrent licenses (based on the maximum number of simultaneous users). Please see the license terms elsewhere for full details. One media package (CDROM) is included with each multi-user license. All prices are in Euro "per PC" or "per concurrent user", respectively, and include 19% Dutch VAT. If your company has a VAT ID, or is located outside the EC, it does not have to pay Dutch VAT and you can divide the prices by 1,19 to find your nett price.

SmartDraw Enterprise Seat and Concurrent License Order Form

With an enterprise seat license you simply count the number of different PC's that will use SmartDraw, then purchase a license for that many seats. You can install SmartDraw individually on each PC, or you can install it on a server and allow PC's to access it across a network. You don't need to buy a license for every PC attached to the network, just a number that actually use SmartDraw. SmartDraw keeps track of this for you. Visit the SmartDraw web site at http://www.smartdraw.com/enterprise/index.htm for more license information.

A concurrent license is always installed on a server, and it measures the number of network users running SmartDraw simultaneously. With a concurrent license you can install SmartDraw on a network with any number of PC's. SmartDraw keeps track of the number of PC's actually using it at any one time and limits this to the number of users you actually licensed. Visit the SmartDraw web site at http://www.smartdraw.com/enterprise/index.htm for more license information
