

# Dragon UnPACKer

v5.0.0.134

©Copyright 1997-2004 Alexandre Devilliers

---

First of all, this program is **open source** that means you should not have paid to use it, nor for download it except cost of normal shipping or communications fees and that source is available under Mozilla Public Licence 1.1.

Any public version (beta, release candidate or final) can be placed on any media for distribution (ex: CD-Rom, FTP, HTTP, etc..). But all text files must stay intact, and no files can be added to the zip file.

Please note that this is a complete recode since version 4 and it lacks some features from older version 4. But is (hopefully) much more stable and bug free.

Report any bug on the bug tracker at : <http://sourceforge.net/projects/dragonunpacker>

Version 4 and version 5 of *Dragon UnPACKer* can coexist on same computer but you should not install them in same directory.

---

## What's new since last version (5.0.0 RC4):

- The program is now in stable/production state.
- Some bugs corrected.
- Added support for :
  - Cyberbykes .BIN
  - Freedom Fighters .TEX
  - Hitman 2: Silent Assassin .TEX
  - Hitman: Contracts .TEX and .PRM
  - Painkiller .PAK

## What's new since version 4:

- Complete rewrite from scratch using *Delphi 7 Personal Edition*. That means no more 2mb DLLs for the program to run.
- Use of external drivers (DLLs) for an easy update capability and allowing anyone to make drivers for Dragon UnPACKer.
- Added full *Giants: Citizen Kabuto* **GZP** support (including compressed files).
- Added full *Unreal Tournament* **UAX/UMX/UTX**.
- Many other new file formats supported plus all other formats already supported in *Dragon UnPACKer 4*.
- Much faster than version 4.
