What is Personal Passworder?

Personal Passworder is your personal password manager. It will store all your passwords to sites, documents and archives in one encrypted database. Moreover, it will store serial numbers and keys for your programs and any other information like passwords in safe. Here its major features:

EASY TO USE:

- Just two clicks - and your password is in clipboard!
- Different kind of fields: copyable field, hidden field, URL field and so on: you can launch documents and open sites with one click!
- Tray-support: minimize program to tray and use hot-key for quick access
- Bar: small and powerful window, it keeps your desktop from big windows
- Multilingual support: you can change interface language "on fly"
- Multi-user architecture: every user has its own password-protected account

RELIABLE PROTECTION:

- Strong security: files encrypted with BlowFish algorithm with size of key 448 bit
- High security: program may clear clipboard on minimize or exit or when you press F8 key
- Work safe: quick backup and restore for current account
- Password generator: create new unique passwords exactly as you need

MANY USEFUL FUNCTIONS:

- Print function: print out your passwords (Deluxe edition only)
- Import: import your data from Microsoft Excel
- Export: export your data to Microsoft Excel, Html and plain text (Deluxe edition only)
- Customizable structure: not enough standard groups or fields? You can add your own now!
- AND MUCH-MUCH MORE!..

Different languages

This program is "international" and supports several languages for now. Please note that the latest version of Personal Passworder may not be available in your language.

If you can help us to implement the support to another one(s), please drop us a line - you'll get a FREE registration! Just DON'T send us your language file prior to contacting us, as far as such version might be already under development. That's mandatory!

Also, you can earn free registration by proofreading our help file or English.lng file. Please contact us for receiving additional information about this offer!

Updates

You can download the latest versions of Personal Passworder from our official site www.dvasoft.com. All updates of Personal Passworder are free for registered users!

Evaluation and Purchasing

Personal Passworder is not freeware product. You can use it for 30-days on a trial basis. If you decide to keep it after this trial period, you should register your copy/copies by sending in the registration form and the registration fee. After registering you may upgrade at no charge to any newer release. For more information about registration click Help -> Register now!.. in main window.

PLEASE BE CAREFUL NOT TO CHANGE YOUR SYSTEM CLOCK AFTER INSTALLING THIS SOFTWARE. DOING SO MAY CAUSE YOUR EVALUATION PERIOD TO END PREMATURELY.

Contact us

If you have any questions, suggestions or comments about Personal Passworder (or if you have found error in our program) please direct them to support@dvasoft.com. Please let us know what you would like to see in the future versions!

Thank you for using our program!
DvaSoft team.
