

ColorTheme

ColorTheme is the preference panel that changes UI color theme like PalmOS 5.

This application works with Color version **PalmOS 3.5** device.

You can download it from [here](#).

Installation

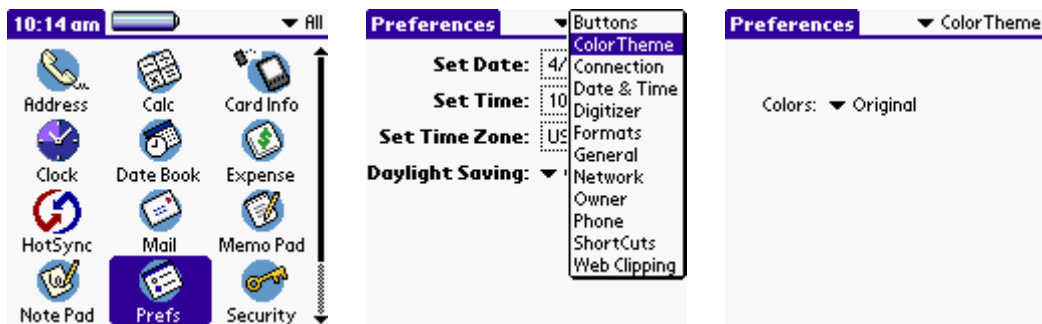

Download ColorTheme11.zip from above link, unzip it and install ColorTheme.prc into your palm device. ColorTheme_jpJP.prc is the Japanese localization file and it is only necessary on Japanese locale device.

Uninstallation

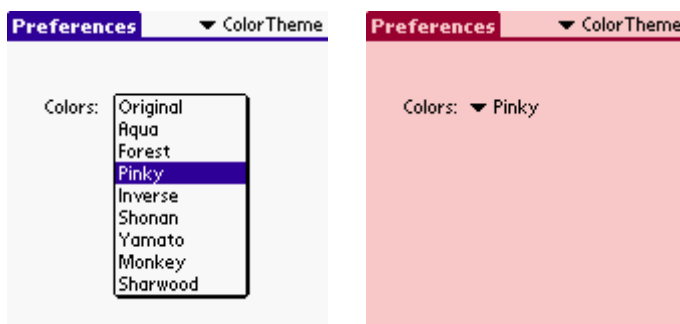

Before you uninstall ColorTheme, be sure to set color theme as original.

Usage

You can not find out an ICON for ColorTheme at Launcher. ColorTheme is a preference panel. First, tap Prefs application and select ColorTheme from a popup list at upper-right.

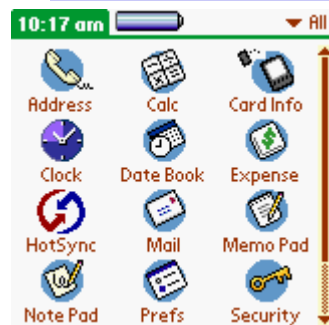

There is only one popup trigger named Colors. Original shows that the current UI color theme setting is PalmOS default one.

You can select some color theme with this popup trigger. Once you set color theme, this setting is used for every applications.

Currently, there are four themes – aqua, forest, pinky and inverse. Stay tuned for more themes.

History

- Version 1.1 2002/04/10 Add more themes and Japanese localization
- Version 1.0 2002/04/05 First Release
