

Windows 95 Hardware Compatibility List (Last updated: September 13, 1996)

The Windows 95 Hardware Compatibility List (HCL) contains products that have been tested and have passed compatibility testing with Windows 95. Please note that we have not tested every computer and/or device in all possible configurations; and that some computers may be sold with peripherals that are not yet supported by Windows 95, or that require a device driver supplied by the manufacturer. For information on downloading and installing drivers for the hardware listed, or for getting your hardware listed in the HCL, please visit the Microsoft Windows Hardware Quality Labs web site at <http://www.microsoft.com/hwtest/>.

To view the HCL, click on one of the following hardware categories:

Windows 95 Hardware Compatibility List

The following hardware has been tested by Microsoft and carry the Designed for Windows 95 logo. In the (Drivers/BIOS) column (Box) means that the driver is in the Windows 95 product and that the hardware does not require additional drivers to be installed; (CD) means that the driver has to be manually installed from the DRIVERS directory on the Windows 95 CD (or from the Internet); (WDL) means that the driver has to be manually installed from the Windows Driver Library (WDL) residing on the Internet; for systems, BIOS vendor and version number is given instead of driver information. If you click on the hot-links in the (Product Name) column, you get additional (foot note) information about product testing, installation, and usage.

Click [here](#) if you would like the list of hardware products that are compatible with Windows 95. These products run on but are not necessarily optimized for Windows 95.

Windows 95 Hardware Compatibility List

The following hardware has been tested by Microsoft and carry the Designed for Windows 95 logo. In the (Drivers/BIOS) column (Box) means that the driver is in the Windows 95 product and that the hardware does not require additional drivers to be installed; (CD) means that the driver has to be manually installed from the DRIVERS directory on the Windows 95 CD (or from the Internet); (WDL) means that the driver has to be manually installed from the Windows Driver Library (WDL) residing on the Internet; for systems, BIOS vendor and version number is given instead of driver information. If you click on the hot-links in the (Product Name) column, you get additional (foot note) information about product testing, installation, and usage.

Hardware Category : Network/WAN

There are no products available at this time for the hardware category you selected.

Click [here](#) if you would like the list of hardware products that are compatible with Windows 95. These products run on but are not necessarily optimized for Windows 95.

Windows 95 Hardware Compatibility List

The following hardware has been tested by Microsoft and carry the Designed for Windows 95 logo. In the (Drivers/BIOS) column (Box) means that the driver is in the Windows 95 product and that the hardware does not require additional drivers to be installed; (CD) means that the driver has to be manually installed from the DRIVERS directory on the Windows 95 CD (or from the Internet); (WDL) means that the driver has to be manually installed from the Windows Driver Library (WDL) residing on the Internet; for systems, BIOS vendor and version number is given instead of driver information. If you click on the hot-links in the (Product Name) column, you get additional (foot note) information about product testing, installation, and usage.

Click [here](#) if you would like the list of hardware products that are compatible with Windows 95. These products run on but are not necessarily optimized for Windows 95.

Windows 95 Hardware Compatibility List

The following hardware has been tested by Microsoft and carry the Designed for Windows 95 logo. In the (Drivers/BIOS) column (Box) means that the driver is in the Windows 95 product and that the hardware does not require additional drivers to be installed; (CD) means that the driver has to be manually installed from the DRIVERS directory on the Windows 95 CD (or from the Internet); (WDL) means that the driver has to be manually installed from the Windows Driver Library (WDL) residing on the Internet; for systems, BIOS vendor and version number is given instead of driver information. If you click on the hot-links in the (Product Name) column, you get additional (foot note) information about product testing, installation, and usage.

Hardware Category : System/Mobile

Windows 95 Hardware Compatibility List

The following hardware has been tested by Microsoft and carry the Designed for Windows 95 logo. In the (Drivers/BIOS) column (Box) means that the driver is in the Windows 95 product and that the hardware does not require additional drivers to be installed; (CD) means that the driver has to be manually installed from the DRIVERS directory on the Windows 95 CD (or from the Internet); (WDL) means that the driver has to be manually installed from the Windows Driver Library (WDL) residing on the Internet; for systems, BIOS vendor and version number is given instead of driver information. If you click on the hot-links in the (Product Name) column, you get additional (foot note) information about product testing, installation, and usage.

Windows 95 Hardware Compatibility List

The following hardware has been tested by Microsoft And have been found To be compatible with Windows 95, but do Not carry the Designed For Windows 95 logo. In the (Drivers/BIOS) column (Box) means that the driver is in the Windows 95 product and that the hardware does not require additional drivers to be installed; (CD) means that the driver has to be manually installed from the DRIVERS directory on the Windows 95 CD (or from the Internet); (WDL) means that the driver has to be manually installed from the Windows Driver Library (WDL) residing on the Internet; for systems, BIOS vendor and version number is given instead of driver information. If you click on the hot-links in the (Product Name) column, you get additional (foot note) information about product testing, installation, and usage.

Windows 95 Hardware Compatibility List

The following hardware has been tested by Microsoft And have been found To be compatible with Windows 95, but do Not carry the Designed For Windows 95 logo. In the (Drivers/BIOS) column (Box) means that the driver is in the Windows 95 product and that the hardware does not require additional drivers to be installed; (CD) means that the driver has to be manually installed from the DRIVERS directory on the Windows 95 CD (or from the Internet); (WDL) means that the driver has to be manually installed from the Windows Driver Library (WDL) residing on the Internet; for systems, BIOS vendor and version number is given instead of driver information. If you click on the hot-links in the (Product Name) column, you get additional (foot note) information about product testing, installation, and usage.

Windows 95 Hardware Compatibility List

The following hardware has been tested by Microsoft And have been found To be compatible with Windows 95, but do Not carry the Designed For Windows 95 logo. In the (Drivers/BIOS) column (Box) means that the driver is in the Windows 95 product and that the hardware does not require additional drivers to be installed; (CD) means that the driver has to be manually installed from the DRIVERS directory on the Windows 95 CD (or from the Internet); (WDL) means that the driver has to be manually installed from the Windows Driver Library (WDL) residing on the Internet; for systems, BIOS vendor and version number is given instead of driver information. If you click on the hot-links in the (Product Name) column, you get additional (foot note) information about product testing, installation, and usage.

Hardware Category : Modem/ISDN

There are no products available at this time for the hardware category you selected.

Windows 95 Hardware Compatibility List

The following hardware has been tested by Microsoft And have been found To be compatible with Windows 95, but do Not carry the Designed For Windows 95 logo. In the (Drivers/BIOS) column (Box) means that the driver is in the Windows 95 product and that the hardware does not require additional drivers to be installed; (CD) means that the driver has to be manually installed from the DRIVERS directory on the Windows 95 CD (or from the Internet); (WDL) means that the driver has to be manually installed from the Windows Driver Library (WDL) residing on the Internet; for systems, BIOS vendor and version number is given instead of driver information. If you click on the hot-links in the (Product Name) column, you get additional (foot note) information about product testing, installation, and usage.

Hardware Category : Network/WAN

There are no products available at this time for the hardware category you selected.

Windows 95 Hardware Compatibility List

The following hardware has been tested by Microsoft And have been found To be compatible with Windows 95, but do Not carry the Designed For Windows 95 logo. In the (Drivers/BIOS) column (Box) means that the driver is in the Windows 95 product and that the hardware does not require additional drivers to be installed; (CD) means that the driver has to be manually installed from the DRIVERS directory on the Windows 95 CD (or from the Internet); (WDL) means that the driver has to be manually installed from the Windows Driver Library (WDL) residing on the Internet; for systems, BIOS vendor and version number is given instead of driver information. If you click on the hot-links in the (Product Name) column, you get additional (foot note) information about product testing, installation, and usage.

Windows 95 Hardware Compatibility List

The following hardware has been tested by Microsoft And have been found To be compatible with Windows 95, but do Not carry the Designed For Windows 95 logo. In the (Drivers/BIOS) column (Box) means that the driver is in the Windows 95 product and that the hardware does not require additional drivers to be installed; (CD) means that the driver has to be manually installed from the DRIVERS directory on the Windows 95 CD (or from the Internet); (WDL) means that the driver has to be manually installed from the Windows Driver Library (WDL) residing on the Internet; for systems, BIOS vendor and version number is given instead of driver information. If you click on the hot-links in the (Product Name) column, you get additional (foot note) information about product testing, installation, and usage.

Hardware Category : Storage/Raid

There are no products available at this time for the hardware category you selected.

Windows 95 Hardware Compatibility List

The following hardware has been tested by Microsoft And have been found To be compatible with Windows 95, but do Not carry the Designed For Windows 95 logo. In the (Drivers/BIOS) column (Box) means that the driver is in the Windows 95 product and that the hardware does not require additional drivers to be installed; (CD) means that the driver has to be manually installed from the DRIVERS directory on the Windows 95 CD (or from the Internet); (WDL) means that the driver has to be manually installed from the Windows Driver Library (WDL) residing on the Internet; for systems, BIOS vendor and version number is given instead of driver information. If you click on the hot-links in the (Product Name) column, you get additional (foot note) information about product testing, installation, and usage.

Special Notes for Enhanced Am486DX4-100 - Chip

Win95

Comments:

This processor was tested for Windows 95 and Windows NT 3.51 compatibility on the reference systems AMD supplied.

Special Notes for Nx586 Processor P100 - Chip

Win95

Comments:

This processor was tested for Windows 95 and Windows NT 3.51 compatibility on the reference systems NexGen supplied.

Windows 95 detects Nx586 as 80386 processor. Some applications that require high-end x86 processors may refuse to run if they detect Nx586 as 80386. For example, Microsoft Hover won't run because it requires a 80486 or above to run. Contact NextGen Inc. for more information.

Special Notes for TI 486DX2-80 - COM

Win95

Comments:

This processor was tested for Windows 95 and Windows NT 3.51 compatibility on the reference systems Texa Instruments supplied.

Special Notes for P30 - PCI

Win95

Comments:

Set monitor timing using the S3REFRSH.EXE utility

Special Notes for P50E - PCI

Win95

Comments:

Set monitor timing using the CLMODE.EXE utility.

Highest resolution that supports 75Hz refresh rate is 1024x768x256 colors

Special Notes for P60 - PCI

Win95

Comments:

Set monitor timing using the S3REFRSH.EXE utility

Special Notes for ProMotion - PCI

Win95

Comments:

Run the PM_FONT.COM TSR to install EGA fonts if needed.

Special Notes for 1000PV - PCI

Win95

Comments:

Highest resolution that supports 75Hz refresh rate is 1024x768x256 colors.

Special Notes for Graphics Pro Turbo PCI Mach64 - PCI

Win95

Comments:

Adapter will not function with the ATI drivers provided in Windows 95 if the relocatable I/O jumper is enabled.

Special Notes for ALG 2301 PCI - PCI

Win95

Comments:

Set monitor timing using the ASCAN.EXE utility

Special Notes for ALG 2302 PCI - PCI

Win95

Comments:

Set monitor timing using the ASCAN.EXE utility

Special Notes for SuperX VGA - PCI

Win95

Comments:

Set monitor timing using the CLMODE.EXE utility.

Special Notes for Voyager 64 - PCI

Win95

Comments:

Set monitor timing using the VREFRESH.EXE utility.

Special Notes for F65548 PCI - PCI

Win95

Comments:

Use the CT.COM utility to disable screen panning when display is connected to a monitor.

Special Notes for GD5430 Demo Board Kit - PCI

Win95

Comments:

Set Monitor refresh rates using the CLMODE.EXE utility.

Special Notes for GD5434 PCI Demo Board Kit - PCI

Win95

Comments:

Set monitor refresh rates using the CLMODE.EXE utility.

Special Notes for GD54M30 PCI Demo Board Kit - PCI

Win95

Comments:

Set monitor refresh rates using the CLMODE.EXE utility.

Special Notes for MGA Millennium - PCI

Win95

Comments:

Tested on 2MB configuration.

DDC may not work on pre-production bios. Contact Matrox regarding the availability of bios updates.

Special Notes for #9GXE64 - PCI - PCI

Win95

Comments:

Set refresh rate using the RFRSH95.EXE utility provided by Number Nine.

Special Notes for 9FX Motion 531 - PCI - PCI

Win95

Comments:

Set refresh rate using the RFRSH95.EXE utility provided by Number Nine.

Special Notes for 9FX Motion 771 - PCI - PCI

Win95

Comments:

Set refresh rate using the RFRSH95.EXE utility provided by Number Nine.

Special Notes for 9FX Vision 330 - PCI - PCI

Win95

Comments:

Set refresh rate using the RFRSH95.EXE utility provided by Number Nine.

Special Notes for Spitfire 64107D2 - PCI

Win95

Comments:

Set refresh rate using Control Panel applet.

Special Notes for Trio64V+ - PCI

Win95

Comments:

The S3 765 is detected as a S3 764 but will only work in 640x480 16 color mode until the S3_2.DRV is installed.

Special Notes for TGUI 9660 XGi - PCI - PCI

Win95

Comments:

Set monitor timing using SMONITOR.EXE utility.

Special Notes for TGUI 9680 - PCI

Win95

Comments:

Set monitor timing using SMONITOR.EXE utility.

Special Notes for GrafixStar 300 - PCI

Win95

Comments:

Installs by default as a S3 Trio 32/64. Use display control panel setting to change drivers.

Refresh rate is set from the display control panel advanced tab.

Special Notes for GrafixStar 700 - PCI

Win95

Comments:

Installs by default as a S3 968. Use display control panel setting to change drivers.

Refresh rate is set from the display control panel advanced tab.

Special Notes for FlexScan F2.15/33F/F351 - DDC

Win95

Comments:

Requires DDC adapter to be installed on Display Adapter port.

1024x768 is the highest resolution that supports VESA 75 Hz monitor timing standard.

Special Notes for FlexScan F2.17/52F/F553 - DDC

Win95

Comments:

Requires DDC adapter to be installed on Display Adapter port.

1024x768 is the highest resolution that supports VESA 75 Hz monitor timing standard.

Special Notes for FlexScan F2.17EX/F563 - DDC

Win95

Comments:

Requires DDC adapter to be installed on Display Adapter port.

1280x1024 is the highest resolution that supports VESA 75 Hz monitor timing standard.

Special Notes for FlexScan F2.21/77F/F764 - DDC

Win95

Comments:

Requires DDC adapter to be installed on Display Adapter port.

1280x1024 is the highest resolution that supports VESA 75 Hz monitor timing standard.

Special Notes for FlexScan FX2-21 / 88F / F784 - DDC

Win95

Comments:

Requires DDC adapter to be installed on Display Adapter port.

1280x1024 is the highest resolution that supports VESA 75 Hz monitor timing standard.

Special Notes for FlexScan T2.17/56T/T563 - DDC

Win95

Comments:

Requires DDC adapter to be installed on Display Adapter port.

1024x768 is the highest resolution that supports VESA 75 Hz monitor timing standard.

Special Notes for FlexScan T2.17TS/54T/T562 - DDC

Win95

Comments:

Requires DDC adapter to be installed on Display Adapter port.

1280x1024 is the highest resolution that supports VESA 75 Hz monitor timing standard.

Special Notes for FlexScan T2.20/68T/T662 - DDC

Win95

Comments:

Requires DDC adapter to be installed on Display Adapter port.

1280x1024 is the highest resolution that supports VESA 75 Hz monitor timing standard.

Special Notes for MultiSync XE15 - DDC

Win95

Comments:

1024x768 is the highest resolution that supports VESA 75 Hz monitor timing standard.

Special Notes for MultiSync XE17 - DDC

Win95

Comments:

1024x768 is the highest resolution that supports VESA 75 Hz monitor timing standard.

Special Notes for MultiSync XV14 - DDC

Win95

Comments:

1024x768 is the highest resolution that supports VESA 75 Hz monitor timing standard.

Detects as a "VESA DDC monitor" use display control panel to select the XV14 monitor

Special Notes for MultiSync XV15 - DDC

Win95

Comments:

1024x768 is the highest resolution that supports VESA 75 Hz monitor timing standard.

Detects as a "VESA DDC monitor" use display control panel to select the XV15

Special Notes for MultiSync XV17 - DDC

Win95

Comments:

Win95

Comments:

1024x768 is the highest resolution that supports VESA 75 Hz monitor timing standard.

Special Notes for RT-91xxx Multimedia - Keyboard

Win95

Anomalies found:

The Mute button on the keyboard generates a loud bang through the speakers every time it is pressed. The speaker input adapter (that plugs into system's mic out) cannot be inserted fully; doing so will cause the right channel to become disconnected. If the adapter is pulled out slightly, then both left and right channels work.

Special Notes for SENS 810 - EISA

Win95

This modem passed VoiceView tests.

Special Notes for Sound Expression 14.4 SRS - EISA

Win95

This modem passed VoiceView tests.

Special Notes for Sound Expression V.34 SRS - EISA

Win95

This modem passed VoiceView tests.

Special Notes for Supra 288i SP - ISA

Win95

Passed PnP, and Data/FAX testing.

Special Notes for XJ2288 28.8/14.4 PCCard Modem - PCMCIA

Win95

Comments:

This modem is supported by Windows 95. No driver files are needed for the customers.

Special Notes for DeskPorte FAST - COM/LPT

Win95

Comments:

This modem supports both serial and parallel connections. If the user cannot get parallel connection to work, try different parallel transfer mode which is normally available in BIOS setup.

To allow 16-bit communication software work with the modem, the user needs to run a vendor supplied program. Please read installation document for more details.

Special Notes for TR14401 Trumpcard Jack of Diamonds 14.4 - PCMCIA

Win95

Comments:

In order to allow Windows NT to detect the modem properly, the user needs to follow the installation guide and append the vendor provided INF file to the end of MODEM.INF shipped in Windows NT. This is a by design behavior.

Special Notes for TR14403 Trumpcard Jack of Diamonds 28.8 - PCMCIA

Win95

Comments:

In order to allow Windows NT to detect the modem properly, the user needs to follow the installation guide and append the vendor provided INF file to the end of MODEM.INF shipped in Windows NT. This is a by design behavior.

Special Notes for RCV144ACF - ISA

Win95

Comments:

This modem is detected by Windows 95 automatically and you will be prompted to install the driver. Insert the vendor supplied installation disk and then press Enter.

Some Plug and Play BIOSes may not be able to configure this ISA Plug and Play adapter properly. If the modem doesn't work after the installation, go to Control Panel and then select Systems. Highlight the modem and click on Properties. This modem has three configurations (config 0 - 2). Uncheck Automatic Settings and then select configuration 2. You can choose proper IRQ or I/O settings and change the resource configuration on the fly.

This is an 8-bit ISA card so the IRQ support is limited.

Special Notes for 28.8 PnP Data/Fax/Voice Speaker Phone - ISA

Win95

Device was not tested with Unimodem/V or MS Phone

Special Notes for SupraExpress 144i PnP - ISA

Win95

Comments:

The modem is hosted on an ISA Plug and Play adapter which is automatically detected and installed by Windows 95.

Special Notes for SupraFAXModem 288i PnP - ISA

Win95

Comments:

The modem is hosted on an ISA Plug and Play adapter. It will be automatically detected and installed by Windows 95.

Special Notes for AHA-1530P - ISA

Win95

This adapter is detected and installed by Windows 95 automatically. As a result, the in-box driver will be loaded. In order to make use of the SCAM features, the user needs to replace the in-box driver located in `\windows\system\iosubsys\SPARROW.MPD` by the new driver in WDL.

Special Notes for AHA-1542CP - ISA

Win95

This adapter is detected and installed by Windows 95 automatically. As a result, the in-box driver will be loaded. In order to make use of the SCAM features, the user needs to replace the in-box driver located in `\windows\system\iosubsys\AHA154X.MPD` by the new driver in WDL.

This applies to all SCSI adapters that support MS-DOS and Windows 3.x. If the system was using real-mode drivers loaded in CONFIG.SYS before upgrading to Windows 95, you might want to make sure you are actually using the 32-bit protection-mode drivers by going to Start | Settings | Control Panel and then click on Systems. When Systems is up, click on Performace. The text in the dialog box should not say that you are using MS-DOS compatible devices. If you see the complaint, and if it points to the devices connected to the SCSI adapter, you can comment out the real-mode drivers in the CONFIG.SYS file.

Special Notes for P5490-95 - PCI
