# Apple® II Peripheral Products

Apple® 3.5 Drive

- The Apple 3.5 Drive, the external drive of choice for Macintosh ® Plus, SE, Apple IIGS, Apple® IIe, and IIc Plus personal computer users. Like the Apple 3.5 internal drive that's built into the Macintosh Plus, SE and IIc Plus computers, the 3.5 drive, adds 800K of external data storage on double-sided double-density 3.5" diskettes.
Apple® 5.25 Drive

- The Apple 5.25 Drive is the ideal drive for any Apple II CPU user. The Apple 5.25" drive stores 143KB of data and is compatible with thousands of Apple II software programs and all Apple II CPUs, the Apple II, II+, IIe, IIGS®, IIc, and IIc Plus. Users can further increase disk storage capacity by connecting additional drives directly to the Apple 5.25 drive. Both Apple 3.5 and 5.25 drives can be "daisy chained" together providing users the utmost in disk format, size, flexibility, and capacity.
Apple® Desktop Bus™ Mouse

- The Apple Desktop Bus (ADB) Mouse is designed for use with Apple IIe personal computers that have been upgraded to the capabilities of the Apple IIGS system.® It provides direct interaction with the on-screen cursor, offering fast and easy control of the computer when using any mouse- driven Apple II software. The ADB Mouse is the same mouse that comes with the Apple IIGS and any Macintosh computer equipped with an ADB® connector.
Apple® Hard Disks: 20SC, 40SC, 80SC

- Providing 20, 40, or 80 megabytes of storage capacity, Apple Hard Disks are ideally suited to the growing requirements of business and professional users of Macintosh, Apple IIe, or Apple IIGS® personal computers who want to store multiple applications programs and data files in one convenient location. Besides offering ample storage, Apple Hard Disks let you access data up to twelve times faster than 3.5-inch floppy-disk drives.
Apple® II Memory Expansion Cards

- An Apple Memory Expansion Card adds as much as a megabyte of user memory (RAM) to any Apple II personal computer. Two cards are available: the Apple IIGS Memory Expansion Card and the Apple II Memory Expansion Card.
Apple® II Monochrome Monitors

- The Apple Monochrome Monitor (for the Apple IIGS® or Apple IIc) and the Apple Monochrome Monitor IIe (for the Apple IIe, Apple II Plus, or Apple II) display crisp, easy-to-read text and sharp graphics. Their 12-inch high-resolution antiglare screens are easy on your eyes, making them the displays of choice for text-based applications and long stretches of work. They're ideal for applications that don't require color.
AppleColor ™ RGB Monitor

• The AppleColor RGB Monitor is the recommended color monitor for the Apple IIGS computer because it takes advantage of the Apple IIGS advanced graphics capabilities. Working with the high-resolution graphics modes of the Apple IIGS, the AppleColor RGB Monitor brings you stunning graphics in up to 256 colors at a time from a palette of 4,096 colors. It can also display crisp, clear 80-column text on its 12-inch screen.
Apple® IIc Plus

- The Apple IIc Plus personal computer gives you versatility, expandability, ease of use, and software compatibility. This complete personal computer lets you access the world's largest software library: over 10,000 programs written for the Apple II family. It gives you high-quality color graphics, built-in ports for easy access or expansion, and the Apple II computer's ease of use.
Apple® IIe

- With an Apple IIe, you have access to the world's largest collection of personal computer software: more than 10,000 Apple II applications for education, the home, and business. The expansion capabilities of the Apple IIe let you easily customize it to do exactly what you need. You can upgrade your Apple IIe to have all the capabilities of the Apple IIGS, including high-resolution color graphics and realistic sound.

Apple IIGS®

• The Apple IIGS personal computer is the most powerful, most colorful Apple II® ever made. The Apple IIGS combines the best of the Apple IIc (its built-in accessory ports) and the best of the Apple IIe (its versatile expansion slots) with an interface similar to that of the Macintosh® personal computer. It also offers powerful new features, such as high-resolution color graphics, 15-voice sound, and the new 65C816 microprocessor.
Apple IIGS® Upgrade

- The Apple IIGS Upgrade gives your Apple IIe personal computer the advanced capabilities of the most powerful Apple II. This simple, dealer®-installed option enables you to use new software that takes advantage of the incredible sound and color graphics capabilities of the Apple IIGS, and to enjoy its built-in expandability—all without sacrificing your investment in your Apple IIe or your existing software.

Apple ® ImageWriter ® II

- The Apple ImageWriter II printer works with any Apple personal computer to create high-quality text and graphics. The ImageWriter II can print up to 2.5 pages per minute. You can choose the "near-letter-quality" mode for documents with a professional look. Add the ImageWriter II SheetFeeder for cut-sheet printing. An AppleTalk ® card allows up to 31 users to share an ImageWriter II over the AppleTalk Personal Network system.

The power to be your best ™
