iMac to go.
Introducing iBook.

A Feast for the Senses

Stylish as well as practical, iBook is delicious to look at and a pleasure to use. First, choose your favorite luscious color. Then pick up iBook by its convenient foldaway handle and take it wherever you need to. The brilliant TFT active-matrix display will delight you by bringing on-screen colors to life.

Instant Internet

iBook helps you start exploring the Internet right away. Use the built-in 56K modem or 10/100BASE-T Ethernet port.* Or order the high-speed AirPort Card, connect to an AirPort wireless network, and take the

Internet with you to your living room couch, your back porch, or that shady lawn outside your dorm. We've even included a free 30-day Internet trial offer.

High Performance, Low Price

iBook gets its zesty performance from a 300-MHz PowerPC G3 processor. It also features a built-in CD-ROM drive, a 3.2GB hard disk drive, and a high-performance graphics accelerator. When you're on the go, it can run for up to 6 hours between battery charges.** Of course, all these powerful features come with traditional iMac affordability.

AppleCare: World-class Service and Support

Whether at home or on the road, iBook is backed by AppleCare, Apple's world-class service and support program. With genuine Apple parts, extended hardware service options, and phone and Internet support, we provide you with value-added service and support choices that meet your needs. For more information, visit www.apple.com/support.

Get unwired. Introducing AirPort wireless networking.

AirPort adds a whole new dimension of portability to iBook, giving you freedom to access the Internet from virtually anywhere in your home—without wires.

That means you can check e-mail, surf the web, and download files, whether you're in your living room or backyard. Setup is elegantly simple, so you're just minutes away from

wireless web surfing. An AirPort Card installed in your iBook sends and receives data via an AirPort Base Station, which is connected to your phone jack, DSL modem, or cable

modem. And its high-speed 11-Mbps performance means that everything you do with AirPort is lightning fast. AirPort is the fastest and easiest wireless way to the Internet.
