

What You're Missing!

[Multiple Document Interface](#)

[User Defined Toolbox](#)

[More HTML Code](#)

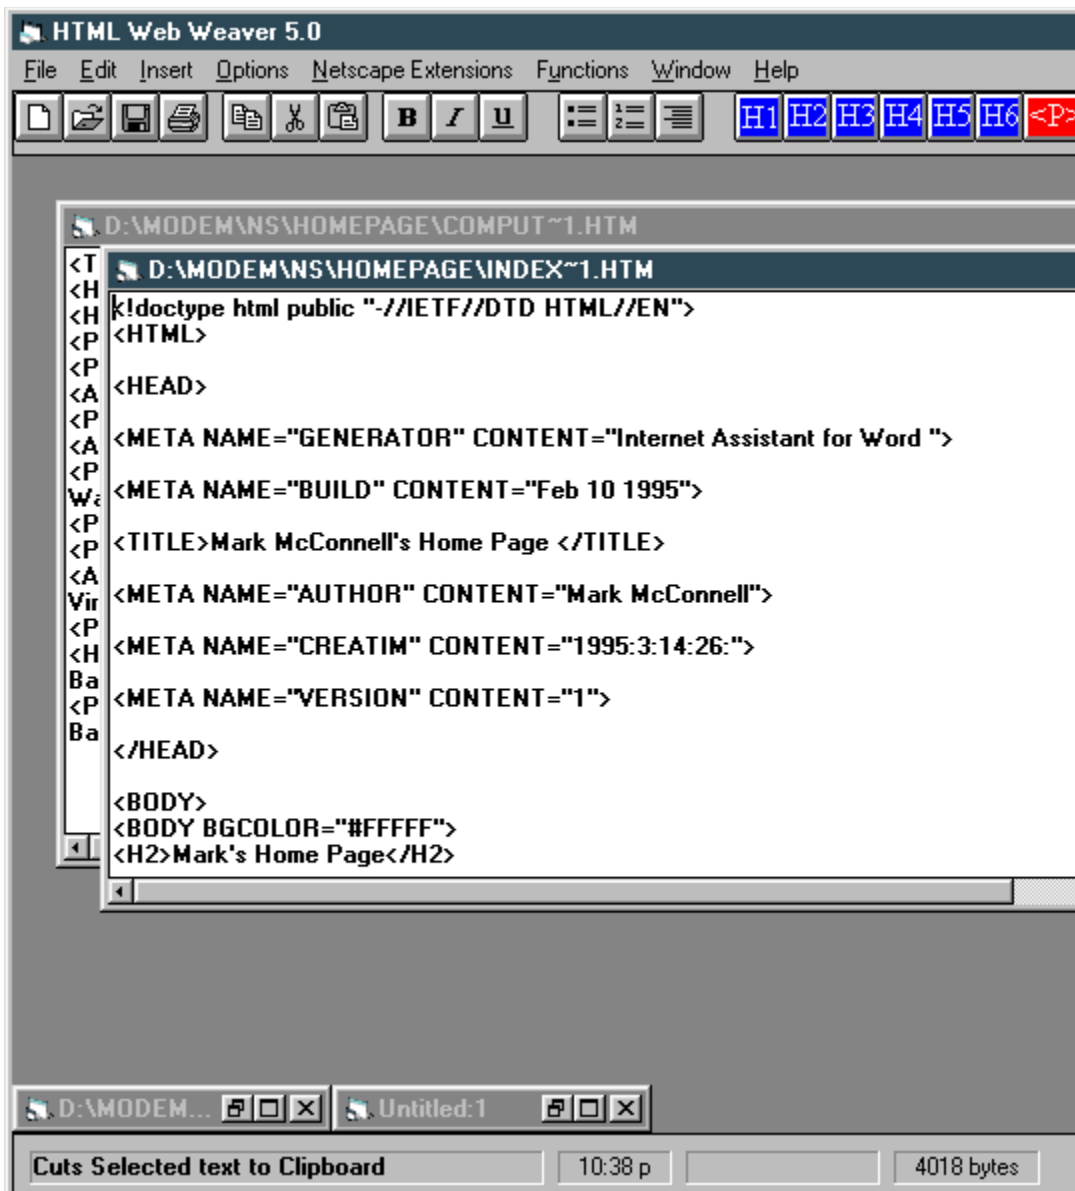

[More Netscape Extensions](#)

[More Features](#)

[Web Weaver 5.0 Coming Soon](#)

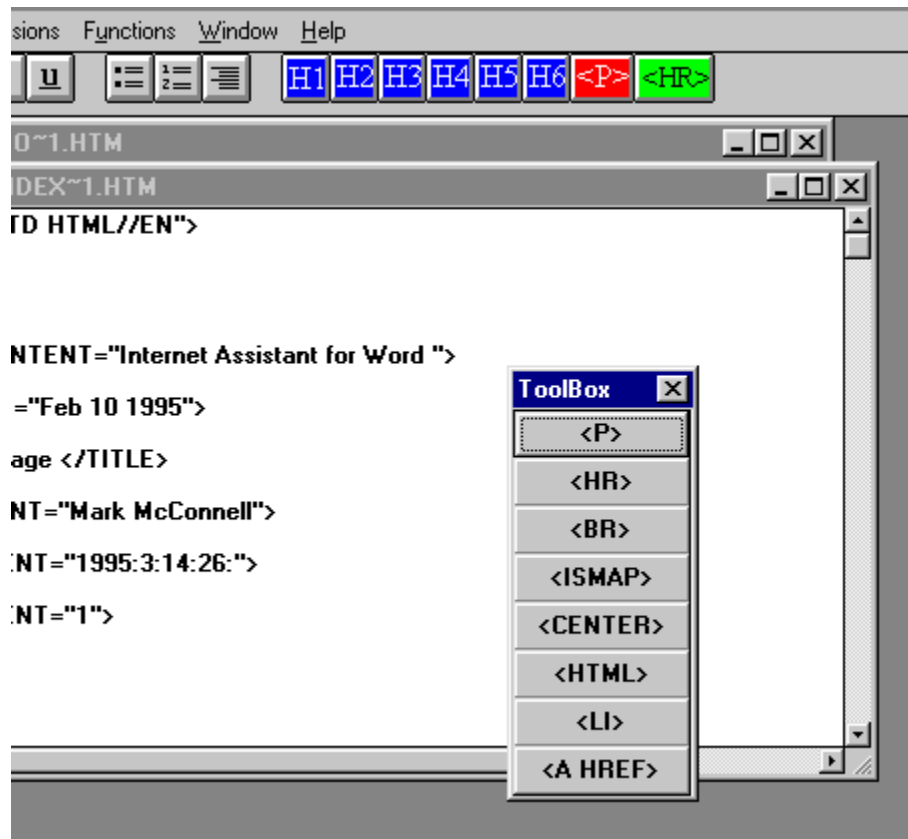

Multiple Document Interface

Web Weaver 5.0 makes it possible to edit more than one document at a time. This makes it easier to cut and paste between documents.

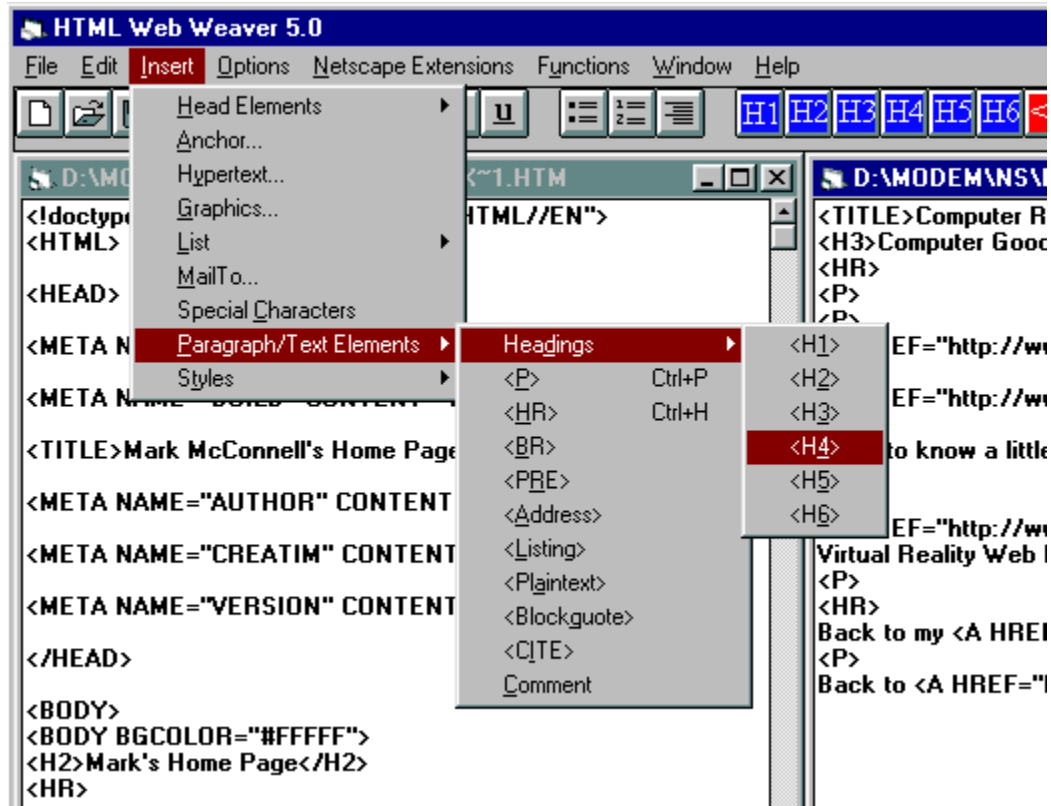

User Defined Toolbox

The user defined toolbox makes it easier to insert HTML code that you often use. This will speed up the creation of your HTML documents.

More HTML Code

More HTML code menu items also facilitates the creation of Web pages and it also informs you of codes you didn't know about (making you more knowledgeable about HTML). HTML 3.0 code like tables will be included as well as Forms, more Lists, and MailTo.

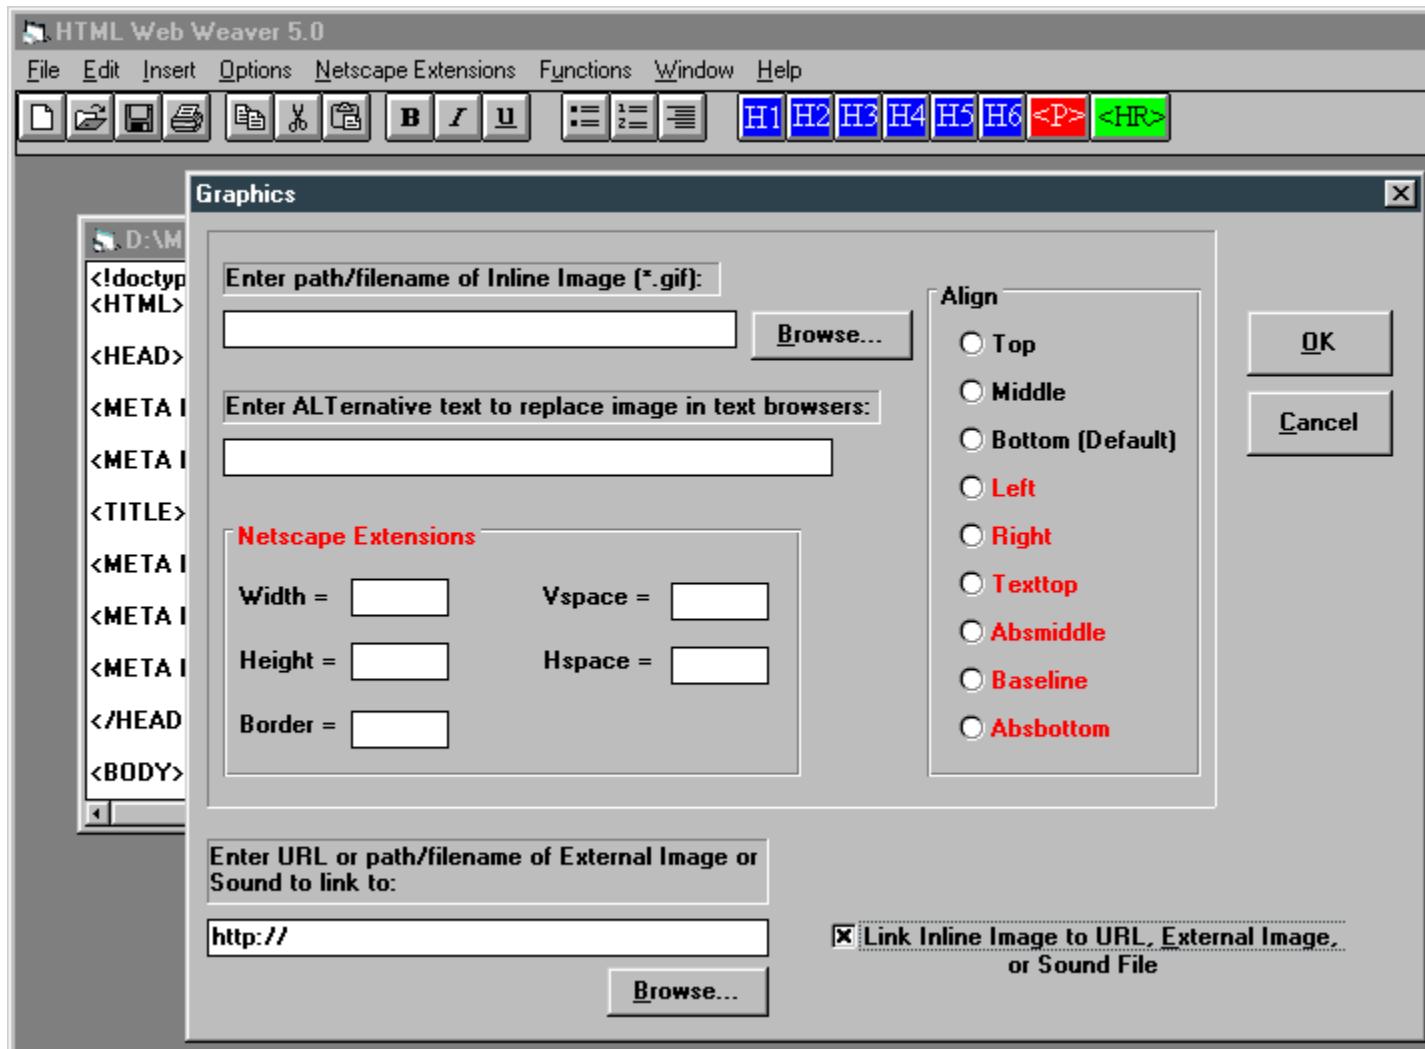

More Netscape Extensions

More HTML Netscape extensions are included in Web Weaver 5.0 like Background wallpapers and Background colors.

More Features

Added features like:

- Find/Replace
- User Defined Toolbox
- Browse buttons on Hypertext and Graphics Insert dialog boxes
- Extended Help feature

Web Weaver 5.0 Coming Soon

Web Weaver 5.0 will release by September 1995.

Look for it!
