Company Background:

Net1, Inc. is a technological company based in Phoenix, Arizona whose mission is to introduce and support core technology software and services. Incorporated in January 1995, our initial product release is a licensable, secure Internet commerce payment technology.

Presentation Overview:

This presentation will be a discussion and demonstration of non-intrusive hardware based authentication services providing for non-repudiation in electronic commerce transactions.

Speaker Background:

Russell Davidson is currently President and CEO of Net1, Inc. With over thirteen years of experience in the systems field, Mr. Davidson's position prior to joining Net1 was SystemsDevelopment Manager for the Marketing and Research divisions of Grubb & Ellis. His experience includes product commercialization, and enterprise-wide systems development and implementation. Prior to Grubb & Ellis, Russ held managerial and technical systems positions with ExecuData/Cmi, Household Research Institute and IBM Instruments, Inc.
