

# THE 1997 RSA DATA SECURITY CONFERENCE

## SPEAKER BIOGRAPHY

### PRODUCT DEMO I

Philips Third-Generation Crypto Controllers

Speaker: **Stefan Philips**

Philips Semiconductors

PS-SLH Stresemannallee

Hamburg, 22529

Germany

Phone: 494056-32747

Fax: 494056-33732

### Company Background:

Philips Semiconductors, a division of Philips Electronics, is the world's tenth largest semiconductor manufacturer. Products include innovative devices for the communications, multimedia, consumer electronics, automotive and identification markets. Philips is the leading producer of Crypto-Controller ICs for fast calculation of public key algorithms, as demanded in state-of-the-art smart card applications.

### Presentation Overview:

This session presents an overview of Philips' latest crypto controllers and how they set out to face today's demands for cryptographic facilities on chip cards.

### Speaker Background:

As a development engineer at Philips Semiconductors, Stefan Philipp is involved in both product innovation and technical support of Philips' chip card ICs. Mr. Philipp graduated from the Rheinisch-Westfälische-Technische-Hochschule Aachen in 1994.
