

Security Dynamics designs, develops, markets and supports a family of security products used to protect and manage access to computer-based information resources. The company's family of products employs patent-protected token technology and software or hardware access control products to authenticate the identity of users accessing networked or stand-alone computing resources. RSA Data Security, Inc., is a recognized world leader in cryptography and developer tools for network security. With a robust list of Fortune 500 customers and licensees, the combined companies are positioned to supply security solutions and standards for corporate enterprise wide networks, Intranets and the Internet. Security Dynamics and RSA can be found on the World Wide Web at <http://www.securid.com/> and <http://www.rsa.com/>.
