Company Background:

Netscape Communications Corporation is a leading provider of open software for linking people and information over enterprise networks and the Internet. The company offers a full line of clients, servers, development tools and commercial applications to create a complete platform for next-generation, live online applications. Netscape is based in Mountain View, California.

Presentation Overview:

A multi-platform network-centric secure programming architectural framework will be presented.

Speaker Background:

Eric Greenberg is a Security Product Manager at Netscape Communications where he is responsible for components of Netscape's security infrastructure, including the Secure Sockets Layer (SSL) protocol, application programming interfaces, hardware tokens, and electronic commerce. Prior to joining Netscape, Mr. Greenberg was Director of Global SprintLink Internet Services, where he led a group deploying one of the world's largest commercial Internets.
