President SecureWare, Inc.

2957 Clairmont Road Suite 350

Atlanta, GA 30329

Phone: 404-315-6296 Fax: 404-315-0293

Email: luther@secureware.com

Company Background:

SecureWare, Inc., an Atlanta-based security software company, is a leading provider of secure network communications and application products designed to protect sensitive data in enterprise networks. Founded in 1986, SecureWare has developed some of the world's most secure computer platforms, including those by the U.S. Department of Defense and other military and intelligence agencies. SecureWare also has designed the security architecture for the first Internet bank, Security First Network Bank.

Presentation Overview:

The security solution for the world's first full-service virtual Internet bank, Security First Network Bank (SFNB), was provided by SecureWare. The SFNB security solution will be discussed as a real-world example of the layered security needed for secure Internet and Intranet enterprises

Speaker Background:

David F. Luther has more than 14 years experience in the business development and management of computer solutions for commercial and government customers. Formerly Vice President of Business Development, he now is responsible for the strategic direction of the company, leading SecureWare into the commercial software market. Mr. Luther also holds a government security clearance. He is a published author and noted speaker on the topics of computer and network security.
