Colorado Springs, CO 80901

Phone: 719-633-7677

Fax: 719-633-7626

Email: Brendak@globalkey.com

Company Background:

GlobalKey, Inc. was created to pursue the evolving market for secure data communications. Recognizing that most other market leaders emphasize protection through passwords, closed systems and access controls, GlobalKey, Inc. focused on creating a system that would protect data traveling from sender to receiver along worldwide communication links. At the same time, the company recognized that the demand for greater online access by businesses with their vendors, associates and customers would create a market for a secure communications system that is quick, reliable and simple to use.

Presentation Overview:

GlobalKey, Inc. provides "turn-key" integrated communications solutions that give businesses and professionals an unparalleled capability to communicate with other businesses, associates, vendors and customers while assuring the privacy of messages with sophisticated encryption technology. Automated key management makes secure messaging simple without establishing prior arrangements with the intended recipient. Digital signatures ensure privacy and authentication for legal and financial transactions. GlobalKey offers a suite of friendly communications tools that permit secure communications between companies, vendors, associates and customers -- in a seamless global environment.

Speaker Background:

Brenda Kallighan is the Director of Domestic Marketing for GlobalKey, Inc. and is actively involved with the product launch of the GlobalKey service and with identifying new applications for GlobalKey's technology. Prior to joining GlobalKey, Inc., Ms. Kallighan was responsible for the manufacture, distribution and management of sophisticated intelligence encryption security systems in both the government and commercial sectors.
