Company Background:

LAN Crypto, Ltd. was founded in 1991. LAN Crypto develops and markets products for the development and end-use of encryption and digital authentication technologies, and provides comprehensive consulting, licensing and research services in the cryptographic science field. Its technologies have become the de-facto standard for data encryption and digital signature all over the CIS states.

Presentation Overview:

This presentation gives an overview of U.S. cryptography regulations and their influence on the last two decades of development of Russian cryptography, with a glimpse of the current state of the art Cryptography and some possible future consequences.

Speaker Background:

Anatoly Lebedev, Ph.D., founded LAN Crypto, Ltd. and has served as its CEO since 1991. From 1977 to 1991, Dr. Lebedev worked with the Governmental Communications Service of the USSR. He received his Doctoral Fellowship in 1977 from Moscow State University, and graduated in mathematics from the same university in 1974.
