Email: rwilson@tiac.net

Company Background:

Concord Networks, Inc. was formed in 1995 to provide security solutions for the new two way cable TV services. CNI has had multiple contracts with the nation's largest cable operators and cable vendors to support the definition of and solution to the massive piracy problem that exists in CATV. CNI is presently under contract to integrate the new security specifications defined by the cable industry into future interoperable products for data, telephony and entertainment.

Speaker Background:

Robert Wilson is President of Concord Networks, Inc. He has been involved in network security system designs for the past 15 years, first at MIT Lincoln Laboratory, then at M/A-COM Linabit and SAIC. The systems he has designed have had military and government, as well as commercial applications. Most recently, Mr. Wilson acted for the Cable partnership as project engineer to
