Company Background:

Organized in 1965, Lambert & Associates (L&A), Los Angeles, California, specializes in hands-on Information Security Services, and Business Recovery and Resumption services. Their capabilities include security architecture, policy/standards development, network security, cryptography, security evaluation, security awareness, and contingency planning. L&A's client list includes financial institutions, hospitals, diversified holding companies and non-profit organizations.

Presentation Overview:

This session provides an update on business sector efforts to influence U.S. and international OECD initiatives on cyber-security in commerce -- issues of free choice in the use of crypto, government access, key management policies, liability, and global availability and interoperability of crypto methods.

Speaker Background:

Sandra M. Lambert, Principal Consultant at Lambert & Associates, Los Angeles, California, was a member of the National Computer System Security and Privacy Advisory Board. She is the Vice Chairperson of the ANSI X9.F Committee on InfoSec Standards for the Financial Services Industry, and serves on the Information Policy Committee of the U.S. Council on International Business, and NIST IT Lab Assessment Panel.
