Company Background:

Unisys Corporation is a global information management company with a broad portfolio of products and services to help clients enhance their competitiveness and better serve their customers through advanced information management solutions. Our portfolio includes: consulting, systems integration, and outsourcing services; powerful hardware and software technologies; and network integration, desktop and support services.

Presentation Overview:

Unisys Single Point Security provides seamless integration between business policies and IT resource management. Highly customizable, its exposed interfaces are available to internal and external developers alike.

Speaker Background:

Bill Buffam is a software architect with Unisys Corporation. His current charter is the conceptual architecture of the Unisys line of security products. Mr. Buffam's background is in operating systems, networking, and solution engineering. He holds a computer science degree from the University of Manchester.
