

Raptor Systems, Inc., headquartered in Waltham, Massachusetts, is a leading developer of integrated network security software products that provide comprehensive, enterprise-wide security for organizational networks. The Eagle family of products address network security for each of the five domains within Raptor's network architecture: the Internet, LANS and Intranets, mobile PC users, remote site and enterprise security management. Product and security information can be accessed via Raptor's World Wide Web site at <http://www.raptor.com>.
