Company Background:

TimeStep Corporation is a technology leader in the development of cryptographic network security solutions. Founded in 1991, TimeStep became affiliated in 1994 with Newbridge Networks Corporation, a world leader in networking products and services.

Presentation Overview:

This talk will discuss the IETF IPSEC Security Standards for extending corporate enterprises over public inter-networks for Secure Virtual Private Networking (SVPN).

Speaker Background:

Tony Rosati is the co-founder and Vice President of Sales and Marketing at TimeStep Corporation. With a background in electrical engineering from the University of Waterloo, he has extensive experience in the application of cryptography and communications to business needs. Mr. Rosati led design teams ranging from the development of public key and DES based integrated circuits to the development of system level communications security solutions utilizing state-of-the-art cryptographic techniques.
