New York, NY 10006

Phone: 212-250-6686

Fax: 212-250-0845

Email: sweiss@astratek.com

Company Background:

AstraTek is a software product development firm, delivering advanced software technologies to Fortune 1000 companies and financial institutions. We provide first class cost-effective solutions to immediate technology needs, with a focus on enterprise mission critical computing, such as distributed computing, multi-tier client-server systems, and object-oriented technology.

Speaker Background:

Stephen Weiss is Vice President of Software Development. Before joining AstraTek, Mr. Weiss led a number of projects at Bankers Trust, including an authentication system providing single sign-on and authorization controls for client-server and legacy-based systems. As part of this project, he negotiated an OEM license with the leading cryptography technology company, RSA Data Security and arranged through the National Security Agency and the U.S. State Department the export licensing required to ship the product outside the U.S.
