Deland, FL 32724

Phone: 904-738-6820

Fax: 904-738-3827

Email: krish@int-soft.com

Company Background:

Intelligent Software Solutions, Inc. (ISS) was founded in 1991. The major product developed and marketed by ISS is XNet License, a cross-platform licensing tool available on over 22 platforms. Intelligent Software Solutions is also the co-developer of Internet Guru, a tool for auto-content publishing on the Internet.

Presentation Overview:

The Internet is a powerful and low cost medium for software distribution. However, piracy on the Internet is a great cause for software developers. Software users, on the other hand are concerned about restrictive licensing policies including copy protection. The goal of this talk is to outline a solution that facilitates software licensing and distribution over the Internet in a secure and user friendly manner. This solution is realized by using robust public and private key algorithms and integrating it with client server licensing technology on the Internet.

Speaker Background:

Dr. Ganapathy Krishnan is the founder and CEO of Intelligent Software Solutions, Inc., a leader and pioneer in internet software licensing and distribution. He has published over 15 papers on topics ranging from image process, neural networks and software licensing. He is also the original developer of XNet License, a product available on 22 platforms.
