### Company Background:

Headquartered in Bellevue, Washington, Deming Internet Security, A Worldtalk Company is an emerging developer of secure electronic messaging and commerce applications and tools. The company was founded in December 1995 by a team of experts in digital messaging and security and was recently acquired by Worldtalk Corporation.

### Presentation Overview:

Deming Software will discuss S/MIME solutions and demonstrate its Secure Messenger S/MIME products, including plug-ins for Microsoft Exchange and Qualcomm's Eudora Pro.

### Speaker Background:

Ron Craswell is Project Leader at Deming Internet Security, A Worldtalk Company. Prior to co-founding Deming Software, Mr. Craswell was the development manager for messaging products at ConnectSoft, Inc. In addition to experience in managing large development teams, Mr. Craswell has significant technical expertise in the areas of cryptography, electronic messaging and Internet technologies.
