

# THE 1997 RSA DATA SECURITY CONFERENCE

## SPEAKER BIOGRAPHY

### PRODUCT DEMO II

Norton "Your Eyes Only"™

Speaker: **David Grawrock**

Software Architect

Symantec Corporation

15220 NW Greenbrier Pkwy Suite 200

Beaverton, OR 97006

Phone: 503-690-4734 Fax: 503-614-7987

Email: [dgrawrock@symantec.com](mailto:dgrawrock@symantec.com)

### Company Background:

Symantec Corporation develops, markets and supports a complete line of application and system software products designed to enhance individual and work group productivity as well as manage networked computing environments. Platforms supported include IBM personal computers and compatibles, Apple Macintosh computers and all major operating systems. Founded in 1982, the company has offices in the United States, Canada, Australia, Japan and Europe.

### Presentation Overview:

This talk will cover the details of how Norton "Your Eyes Only"™ provides encryption to Win95 users. The specification of which file to encrypt uses both manual methods and on-the-fly methods. On-the-fly uses SmartLock folders to create secure directories that always apply encryption to the files in the directory. NYEO provides a secure network administration of public and private keys.

### Speaker Background:

David Grawrock has been developing software for the past sixteen years. He is currently the software architect in the Data Security Business unit at Symantec Corporation where he works on the design of security products for desktop and networked PCs. In addition, he consults with other product teams in the company on the implementation of encryption and other security technologies across Symantec's product lines. Prior to Symantec, Mr. Grawrock worked at Central Point Software and Lotus Development.
