Company Background:

Headquartered in Bellevue, Washington, Deming Internet Security, A Worldtalk Company is an emerging developer of secure electronic messaging and commerce applications and tools. The company was founded in December 1995 by a team of experts in digital messaging and security and was recently acquired by Worldtalk Corporation.

Presentation Overview:

This session provides an overview of secure messaging solutions, including a review and comparison of S/MIME client solutions and S/SMTP server solutions

Speaker Background:

Mr. Ramsdell is a senior cryptographic engineer and project lead at Deming Internet Security, a Worldtalk Company, leading Worldtalk's S/MIME development effort. Prior to co-founding Deming Software and joining Worldtalk, Mr. Ramsdell was a senior cryptographic engineer at ConnectSoft, Inc. In addition to cryptography, Mr. Ramsdell's technical background includes significant work in electronic messaging and Internet technologies, groupware and desktop publishing..
