
file	File	File containing layout
layout		
String	Layout to use for page setup	

PAGE SETUP sets the page setup for the printer to that stored with layout. The page setup is stored with the layout when the layout is created in the Design environment. PAGE SETUP can be used before PRINT SELECTION. Use the PRINT SETTINGS command before PRINT LAYOUT.

The following example sets the page setup to that stored with the Sideways layout:

PAGE SETUP ([Global]; "Sideways")
