

Screen idth -> **Number**
Screen eight -> **Number**

Screen eight and Screen idth return the height and width of the screen in pixels. These commands can be used to determine the type of Macintosh screen in use.

If there are multiple display devices attached to the Macintosh, these commands return the size of the screen where the menu bar is displayed (that is, the main screen).

The following table lists the standard Macintosh screen sizes in pixels:

Macintosh	Height	Width
Macintosh Plus 512		342
Macintosh SE 512		342
Macintosh II (standard monitors) 640	480	
Macintosh 12-inch monochrome 640	480	
Macintosh Portrait Display 640	870	
Two-Page Monochrome monitor 1152	870	
Macintosh 12-inch RGB display 512	384	
AppleColor™ High-Resolution 640	480	
RGB monitor 640		480
Macintosh 21-inch Color Display 1152	870	
Powerbooks 640		400
