### Extend Demo Manual

The "Extend Demo Manual" (in the Extend 3.0 Demo folder) is a Word file that contains an explanation on simulation in general, a short tutorial on model building in Extend, and descriptions of the Sample Models included with this demo.

### About This Demo Version

This is a demonstration package of Extend, Extend+BPR, and Extend+Manufacturing. The examples and libraries included in this demo are subsets of what are included in the full packages. For more information concerning which libraries of blocks are included in which package (Extend, Extend+BPR, and Extend+Manufacturing), see the "Libraries" chapter of this document.

### System 7 Compatibility

Extend, Extend+BPR, and Extend+Manufacturing are System 7 friendly. This means that they run under Apple's System 7 and support System 7 features such as Publish & Subscribe, Balloon Help, Virtual Memory, 32-bit addressing, and TrueType fonts. If you use System 6 rather than System 7, you can still use Extend, Extend+BPR, and Extend+Manufacturing – you just will not be able to use the System 7 features.

### Pricing

Extend	\$695.00
Extend+BPR	\$990.00
Extend+Manufacturing	\$990.00

Registered Extend users may choose to upgrade to Extend+BPR, Extend+Manufacturing, or Extend+BPR+Manufacturing for:

+BPR	\$350.00
+Manufacturing	\$350.00

Please see Chapter 5 for information and pricing on Extend's RunTime version. Educational discounts are also available as well as site and lab licenses. For more information, please contact:
