

SP Voice Info (voice; comment; gender; age) -> err

voice	string (63)	specifys the voice you want to use.
comment	string (255)	returns a comment about the specified voice, i.e. "Adult female voice".
gender	integer	returns the gender of the voice:
	0	Neuter (like robots!)
	1	Male
	2	Female
age	integer	returns the approximate age in years.
err	integer	returns the error which occurred.

A value of zero indicates no error occurred. See below for a list of possible errors.

Returns general information about the specified voice.

Please don't use this function to discriminate based on gender and/or age. Use it only for your information. And try to act in the same way in the real world...

Examples:

```
$err := SP Voice Info ("*",$comment;$gender;$age)
$err := SP Voice Info ("Marvin",$comment;$gender;$age)
$err := SP Voice Info ($voicename;$comment;$gender;$age)
```

Possible errors:

```
0   No Error
-4  Speech Pack can not be used (Speech Mgr not available)
-50 Parameter error (inside external, not necessarily the
    parameters you pass)
-108 Not enough memory
-244 Voice resource not found
```
