

# Player PRO Shortcuts

---

## General

- Use '+' and '-' to move forward and backwards in the partition.
- If you don't have a Mac AV, use ASC Drivers in Preferences (3 times faster than the SoundManager 3.0).
- Drag a folder or a hard disk icon on Player PRO icon to open all MOD & MADF.

## Partition View

- When the music is stopped, click on the fast partition while maintaining the button pressed to listen to a song.

## Digital Editor

- Click on a note while holding the option-key down to listen to that note.
  - Double-click on a note to edit it.

## Classical Editor

- Click on a note while holding down the option-key to listen to that note.
- Click on the trash to destroy all the notes corresponding to the actual track and pattern.
  - Click on the pattern rect to play partition.
- Click on the pattern rect while holding down the option-key to change the view.

## Screensaver

- Use the "\*" and "=" keys to zoom in and out.
  - Use the Space bar to change the form.
  - Use "S" to remove the synchronisation.
- Use the "0" to "9" keys to change the volume.

## FullView

- Use the arrow-keys to change the instruments.
  - Use the arrow-keys to change tracks.
  - Use "\*" and "=" to zoom in and out.
- Use the "0" to "9" keys to change the volume.
  - Use "S" to remove the synchronisation.
  - Use "M" to see 3D...
  - Use "O" to see some stars
  - Use "A" to show the CPU activity of  
Music playing, sinus scrolling, oscilloscope, 3D cube  
(On my Q700, only 30% !!!)
