## **Teacher's Favorite Hangman & Teacher's Favorite Hangman Dictionary Editor Features**

Teachers now you can enter your own terms and definitions into a hangman game program so that it can truly match the material your students are studying in your classroom! You make TFHangman dictionary files using the TFHangman Dictionary Editor and provide exactly the content you want.

The freely distributable version of Teacher's Favorite Hangman should be considered trial-ware. It gives you a chance to try out the Teacher's Favorite Hangman program and Teacher's Favorite Hangman Dictionary Editor, but you will be limited in that each dictionary file you create can have a maximum of 6 terms/definitions. However, you can buy a registration code that once entered into the dictionary editor program will allow you to create dictionary files with hundreds of terms and definitions.

## **SYSTEM REQUIREMENTS**

This version of Teacher's Favorite Hangman was written specifically to run native under Mac OS X (10.0) or higher. A version for PowerPC based Macs running Mac OS 8.1 or higher is available on our web site at <http://fastrabbitsoftware.com/tfhangman.htm>

## **What's new in 2.3?**

Background patterns can now be turned off and on via the PREFERENCE option under the EDIT menu.

## **REGISTER**

Registration is only required for the Teacher's Favorite Hangman Dictionary Editor program if you would like to make dictionary files with more than 6 words. There is no registration fee for the game (Teacher's Favorite Hangman) itself.

What is covered in a single user license purchase? You may install the Teacher's Favorite Hangman package with all associated files (Teacher's Favorite Hangman, Read Me First document, Register program, Teacher's Favorite Hangman Dictionary Editor program) to as many computers as you would like. All files should be included each time and kept together as a package. You may play Teachers Favorite Hangman on any or all of these machines without purchasing a registration code. You should purchase a registration code for each machine where Teacher's Favorite Hangman Dictionary Editor will be used to make lists of more than 6 words. (Actually, without the registration code you can't make lists with more than 6 words.)

Once you have made lists you may copy them to other machines or share them with friends. Please do not share registration code information. The fees I receive are used to help fund development of this and other shareware titles.

Register your copy of Teacher's Favorite Hangman Dictionary Editor through Kagi's secure online order processing system at <http://order.kagi.com/?9WN> Single user licensing: \$19.95, Site licensing: \$49.95 (A great deal if several teachers are interested in making lists.), and District Site Licensing: \$99.95 (A single license to cover all the teachers in all the schools in your district!) is available. Your registration code will be included in the receipt you receive from Kagi via email. It will usually arrive within 4 hours of purchase.

Pay by Mail with Credit Card, Check, Purchase Order (Invoice), or Cash

Open the Register program that accompanies Teacher's Favorite Hangman. Enter your name, Email address, and the number of single user licenses you desire for each program you wish to purchase (or Site or World-Wide licenses). Print the data from the Register program and send the data and payment to Kagi at: Kagi, 1442-A Walnut Street #392-9WN, Berkeley CA 94709-1405, USA

Your registration code will arrive via the email address you provide after payment has been processed.

## **Support**

Visit the TFHangman home page on the web at <http://fastrabbitsoftware.com/tfhangman.htm> or contact us via email at [support@fastrabbitsoftware.com](mailto:support@fastrabbitsoftware.com) with any questions or comments.

## **Distribution**

Teacher's Favorite Hangman and all associated files are distributed AS IS. No warranty is expressed or implied. The author retains all ownership. Reverse engineering or altering of files is prohibited.

You may distribute Teacher's Favorite Hangman to anyone by email, CD-ROM, BBS, FTP, or other as long as the program is unmodified, all original files included with Teacher's Favorite Hangman are included in your distribution, and no registration code is included in your distribution.

## **Check out these other Fast Rabbit Software products**

GradeBook1 - an easy to use gradebook program featuring: password protection, easy backup, auto-save, email linking, birthday reminders, and more.  
<http://fastrabbitsoftware.com/gradebook1.htm>
