

With the option "Week" out of the "View" menu you will be presented a weekly overview holding seven days in one window next to each other starting with the day, that has been chosen the starting day of each week through the application's preferences window.

Each day is displayed in the width of the seventh part of the width of the weekly overview window, so it is good practice to enlarge the weekly overview to the full screen width.

Double clicking a day in the weekly overview brings up the daily overview of the clicked day.
