

## Other System Files Definitions

**Note:** This list attempts to identify all other files anywhere in the system folder that were loaded as part of the system or are currently available to it

This Category has two special listing features. If you hold down the <option> key before selecting this menu item, only Special Files in the System Folder specified with Configure TattleTech will be listed. If you hold down the <shift> key before selecting this menu item, all other system files will be listed.

[Text] = Item only exists under given circumstance

- File Name = File Name
  - ◊ Version = Version number of file if available
  - ◊ File Integrity = Reports if file is damaged
  - ◊ Type = Finder Type designation of file and (class) if known
  - ◊ Creator = Finder Creator designation and (descriptor) if known
  - ◊ System Patcher = There are a number of files besides those executed by the INIT mechanism which can patch the system in various ways. If this is one of those files, this designation appears
  - ◊ Status = Brief explanation of status/impact of file on system [Specific Criteria]
  - ◊ Special Status = OPEN FILE/ACTIVE PRINTER
  - ◊ Modified = Modification date and time
  - ◊ Target Path Name = If this is an alias, location of the original file [Alias File, System 7]
