

opherGolf is the miniature golf game for Macintosh. It's great fun for all ages. Now you and your family can enjoy the fun of putting through castles, windmills, pipes and water in the comfort of your own home. Watch out for that pesky gopher, You never know where he will pop up next.

Play the courses included in this package or create your own courses with the built in editor. You can also play courses created by other registered users. There are over 80 courses available on AOL alone.

Inside Mac Games says

- "Despite two great golf simulations that were released this

summer, this is the golf game I have been waiting for."

- "I can't stress enough how great this game is when friends or

family are over."

- "The controls are simple enough for just about anyone."

Chosen as "Shareware Star of the Month" by MacFormat magazine.  
They said

- "Forget playing tournaments in PGA Tour or Links Pro, the only

golf game you need is right here."

- "The author has spent ages producing one of the best pieces of

shareware I've seen"

- "This will be the best \$15 you've ever spent."
