

Custom Installation...

#### OpenStack Extension

Install the OpenStack Extension into the "Extensions" folder of the active system folder.

---

#### Balloons Help

Install the Balloons Help for OpenStack into the "Extensions" folder of the active system folder.

---

#### OpenStack Guide

Install the OpenStack Guide into the "Extensions" folder of the active system folder. This option need the presence of the "Apple Guide" extension to work properly.

---

#### User Guide

Install the User Guide in eDoc™ format into the "OpenStack Folder" in the root of the selected disk.

---

#### OpenStack Tools

Install the Openstack Tools stack into the "OpenStack Folder" in the root of the selected disk.

---

#### Objects Library (demo)

Install the objects library provided into the "OpenStack Folder" in the root of the selected disk.

---

OpenStack is shareware and NOT free. This means that if you use it, you should pay a \$20 registration fee to Kagi Shareware (see the file "How To Register" for more info).

How to contact us:

If you have any problems installing this software or if you require additional information on OpenStack, please send your mail at:
